RE: Humanmade in Support of Draft Resolution TL-19145

Dear Consumer Protection and Enforcement Division,

I am reaching out on behalf of Humanmade to share our ongoing support for Cruise's application to serve the entire city of San Francisco 24/7. TL-19145 will make San Francisco's transportation options more accessible, affordable, and sustainable for residents and visitors alike.

Humanmade is San Francisco's leading advanced manufacturing training center and maker space. Our mission is to cultivate the next generation of inventors, designers, and makers by providing access to top-notch workforce development training, tools, and facilities. We also shared our support of Cruise's operations expansion during the December/January 2023 comment period for Advice Letter 002, and urge the commissioners to pass Draft Resolution TL-19145.

Cruise's ridehail service and cutting-edge self-driving technology are revolutionizing transportation in San Francisco. Despite the limited and inconvenient public transportation options in the city, only about 54% of residents have cars registered in San Francisco. However, with Cruise's AVs, more residents will have access to safer, cheaper, and accessible transportation.

Humanmade is also proud to partner with Cruise on helping to pave the way for the next generation of workers by creating new employment opportunities. Our collaboration demonstrates the positive impact of emerging technologies and also fosters community. As an example of Cruise's commitment to the greater good, Humanmade's program participants have received meals from the San Francisco-Marin Food Bank and SF New Deal as a result of Cruise's partnership with these organizations to deliver over 2.4 million meals.

Our organization strongly advocates for the commission to approve Cruise's application, granting them the ability to provide around-the-clock service throughout San Francisco. By doing so, Cruise will improve transportation accessibility and support the individuals and communities driving tomorrow's innovations. With its affordable, sustainable transportation solutions, Cruise is a champion for the visionary individuals who are helping to create a greener and brighter future.

Thank you in advance for your consideration.

Sincerely,

Ryan Spurlock
