I support the NO PROJECT alternative. Let Southern CA Edison go back to the drawing board. They can dig into their own deep pockets and design new systems with the significant deterioration environmental impacts on our communities. And, no offense to Veluzat Ranch but why should the economic impact on a single land owner merit the special consideration of researching & preparing Alternative #4. Why does Veluzat's interest outweigh the needs and desires of others. Let SCA Edison pay for No IMPACT improvements & research out of their excessive profits over the years.
