(1) The so-called “scoping process” was flawed and applied without proper noticing.

(2) The “Public” Meeting was not noticed properly and the lead time for discussion is egregiously short, particularly as Alternative # 5’s description is inadequate and introduced late in the process.

(2) Alternative 5 is unacceptable on many levels and will affect my health, noise levels, view, geology, and public services.

This Alternative cannot be taken seriously. I recommend no project alternative.
