Telephone Number*: 714-527-2510

Email*: SharonCC®@Informing.com

Alternate #5 is a bad proposal. This was route is more expensive and cause more pollution to the environment.

It will require acquisition of right-of-way from private land. Also, more construction around homes means more traffic congestion and diversion.

The original proposed route by Southern California Edison is more practical and cause very minimal or negative environmental impacts.

Please either deposit this sheet at the sign-in table before you leave today, or fold, stamp, and mail. Insert additional sheets if needed. Comments must be postmarked by September 18, 2006. Comments may also be faxed to the project hotline at (661) 215-5152 or emailed to antelope-pardee@aspencg.com.
Response to Comment Set D.58: Sharon Chin

D.58-1 Thank you for your comment and concerns. Please see General Response GR-2 regarding property acquisition.

As described in the response to Comment C.9-12, construction of Alternative 5 would result in construction-related traffic on area roads. However, the Project includes several measures to reduce the effects of traffic on local streets. Please see Section C.13.10 of the Draft EIR/EIS of a summary of these mitigation measures.
