Project Activities

-  Work Area
-  Work Area, Work Done During the "Wet Season"
-  Work Area, Work Done During the "Wet Season," Not Hydrologically Connected****
-  Special Work Area
-  Special Work Area, Work Done During the "Wet Season"

Project Activities

-  250 Foot Buffer of "Not Hydrologically Connected Wet Season Work Area"
-  250 Foot Buffer of "Wet Season Work Area"
-  New Tower Site*
-  Replace Existing Tower with New Tower*
-  Bridge Crossing
-  Temporary Access Road**

Existing Facilities

-  Eliminate Tower*
-  Existing Tower - No Structure Work*
-  Tower on Adjacent Line - No Structure Work*
-  Transmission Line
-  Existing Access Road**

Listed Branchiopod Habitat Locations

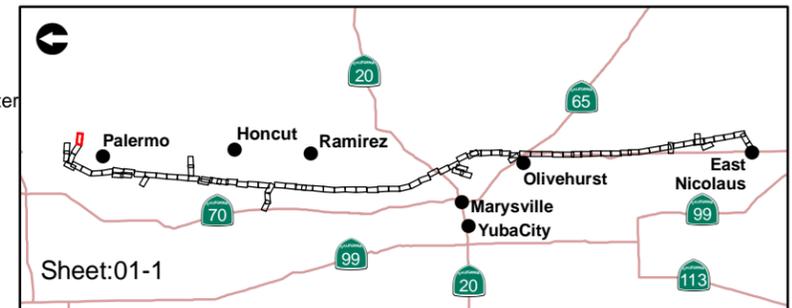

-  Listed Branchiopods Confirmed Absent
-  Listed Branchiopods Confirmed Present
-  Listed Branchiopods Presumed Present

Branchiopod Impact Type

-  Temporary Direct Impact
 -  Temporary Indirect Impact***
- * Towers symbols are not to scale, they appear larger than their true size, approximately 7.5 feet in diameter.
- ** Temporary and existing access roads are assumed to be 16 feet wide.
- *** Temporary Indirect Impact are within 250 feet of a work area, where construction is conducted during the "wet season," unless not hydrologically connected.
- Permanent direct impacts called out on sheets: 27-3, 29-1, 29-2, 30-1. Impacts not shown where listed branchiopods are confirmed absent.
- **** Water features are separated from the work area either topographically or by an existing artificial feature.

Elderberry Shrubs

-  Elderberry Shrub
-  Elderberry Shrub Cluster

* Towers symbols are not to scale, they appear larger than their true size, approximately 7.5 feet in diameter.

** Temporary and existing access roads are assumed to be 16 feet wide.

*** Temporary Indirect Impact are within 250 feet of a work area, where construction is conducted during the "wet season," unless not hydrologically connected.

Permanent direct impacts called out on sheets: 27-3, 29-1, 29-2, 30-1. Impacts not shown where listed branchiopods are confirmed absent.

**** Water features are separated from the work area either topographically or by an existing artificial feature.

* Towers symbols are not to scale, they appear larger than their true size, approximately 7.5 feet in diameter.

** Temporary and existing access roads are assumed to be 16 feet wide.

*** Temporary Indirect Impact are within 250 feet of a work area, where construction is conducted during the "wet season," unless not hydrologically connected.

Permanent direct impacts called out on sheets: 27-3, 29-1, 29-2, 30-1. Impacts not shown where listed branchiopods are confirmed absent.

**** Water features are separated from the work area either topographically or by an existing artificial feature.
