

*Southern California Edison*  
**Presidential Substation Project A.08-12-023**

**DATA REQUEST SET Presidential ED-03 (Part 1)**

**To:** CPUC

**Prepared by:** Christine McLeod

**Title:** Project Manager - Regulatory Affairs

**Dated:** 05/19/2009

---

**Question 11:**

**Project Description**

Provide a description of what the perimeter wall is anticipated to look like, what type of materials (cinder blocks, concrete, etc.) would be used to construct the wall, what color would the wall be.

**Response to Question 11:**

Please refer to the visual simulations provided by SCE in response to Question 2 of CPUC Data Request #2. The wall and landscape design illustrated on the substation visual simulation is based on the City of Thousand Oaks guidelines and standards for landscape planting, the City of Thousand Oaks Architectural review guidelines and standards for evaluating the construction and modification of commercial development, and the Ventura County Fire Plant Reference, Ventura County firesafe landscaping, Ventura County Flammable Plant List, and Ventura County Wildland Fire Safety Guide. Final design for the wall, including the type of materials and color, as well as landscape design would be done in consultation with the City of Thousand Oaks Planning Department after CPUC approval and during the grading permit application review process with the City,
