

Southern California Edison
Presidential Substation Project A.08-12-023

DATA REQUEST SET Presidential ED-03 (Part 1)

To: CPUC

Prepared by: Kristin Kelly

Title: Project Manager, Transmission Licensing

Dated: 05/19/2009

Question 42:

Alternatives

Alternative Work Areas – Provided details regarding work areas anticipated for construction of alternative subtransmission routes or the alternative substation site. Would the marshalling yard be the same? Would additional staging areas be required, if yes where?

Response to Question 42:

The marshalling yard is expected to remain the same for all subtransmission route alternatives. Pull and tension sites and staging areas will change based on location and construction needs for each specific subtransmission route alternative. The exact location and details regarding marshalling yards, staging areas, or other work areas will be subject to change following CPUC project approval, final engineering and construction requirements, and availability of third-party property rights.
