San Joaquin Cross Valley Loop Project A.08-05-039

DATA REQUEST SET SJXVL CPUC-ED-06

To: ENERGY DIVISION
Prepared by: Brent Gokbudak
Title: Project Manager
Dated: 02/06/2009

Question 02:

Please provide construction schedules and workforce requirements for Alternatives 2, 3 and 6. Recognizing that detailed engineering has not been conducted by SCE on Alternative 6, it is understood that the level of detail for this construction schedule may not be the same as was included in the SCE Application and PEA for the Proposed Project. List any assumptions (i.e., crew size, numbers of crews, work hours, etc.), caveats, or other uncertainties as may be appropriate to explain the construction schedules for Alternatives 2, 3, and 6.

Response to Question 02:

See attached. SCE expects to supplement this table during the week of March 16-20, 2009 with similar information for CPUC-proposed Route Alternative No. 6, however, SCE will not have the same level of detail for the CPUC-proposed route upon which to base its construction schedule and workforce requirement estimates. SCE will provide the appropriate assumptions, caveats, and undercertainties when it provides the supplemental information.
