

## Errata: 2009 Gas & Electric Utility Cost Report

The chart below corrects an error in the 2009 Gas & Electric Utility Cost Report. The report originally stated that as of 2009, the average cost of renewable energy was comparable to the prices of the remaining energy portfolio. RPS eligible sources were actually 20% higher on average since 2003.

**Figure 3.4 Average cost of RPS eligible sources and total energy portfolio CORRECTED**
