

PUBLIC UTILITIES COMMISSION  
505 VAN NESS AVENUE  
SAN FRANCISCO, CA 94102-3298

## **2010 Internship Program California Public Utilities Commission's Energy Division**

The California Public Utilities Commission (CPUC)'s Energy Division is seeking qualified interns for 2010. Interns must be currently registered college or graduate level students. The CPUC's summer internship program is supported by a grant from the US DOE and funds provided in the American Resource Recovery Act (ARRA).

### **About the CPUC**

The CPUC regulates investor owned electric and natural gas utilities within the state of California, including Pacific Gas and Electric Company (PG&E), Southern California Edison (SCE), San Diego Gas and Electric Company (SDG&E), and Southern California Gas (SCG). Collectively, these utilities serve over two-thirds of total electricity demand and over three-quarters of natural gas demand throughout California. In addition to the four large utilities, the CPUC also regulates a number of small and multi-jurisdictional energy utilities. Through its oversight of these utilities, the CPUC has played a key role in making California a national and international leader on a number of energy-related initiatives designed to benefit consumers, protect the environment, and support California's economy in difficult times. The CPUC staff provides objective and expert analyses that promote reliable, safe, and environmentally sound energy services at lowest reasonable rates for the people of California. The achievements of the CPUC, and its focus in 2010, are consistent with the Energy Action Plan (EAP) II, adopted by the CPUC and California Energy Commission in 2005, and updated in February 2008. The Energy Action Plan established a "loading order", or priority sequence for actions to address California's increasing energy needs. The EAP's loading order identifies energy efficiency and demand response as the State's preferred means of meeting growing energy needs, followed by renewable resources and distributed generation, and to the extent that these resources are inadequate, clean and efficient fossil-fired electric generation.

### **About the Energy Division**

The CPUC's Energy Division develops and administers energy policy and program to serve the public interest, advise the Commission, and ensure compliance with the Commission decisions and statutory mandates. The Energy Division provides objective and expert analyses that promote reliable, safe and environmentally sound energy services at lowest reasonable rates for the people of California.

### **Internship Work Areas**

Interns may be assigned to a range of policy issues including climate change, electricity procurement and resource planning, resource adequacy, energy efficiency programs, demand response programs, renewable energy and distributed generation programs, and low-income energy assistance programs. Examples of sample internships include:

- Provide support to technical staff in facilitating workshops, producing written and graphic materials and conducting quantitative analysis related to the energy sector in California.
- Aid in the implementation of the California Solar Initiative (CSI), the nation's largest solar rebate program for distributed, onsite solar generation, with a goal of getting 3,000 MW of new solar capacity by 2016.
- Conduct research related to Demand Response Programs.

- Aid in the oversight of the California Renewables Portfolio Standard, the nation's most ambitious renewable energy program, with a goal of getting 20% renewable energy by 2010.
- Aid in the development and oversight of the State's energy efficiency program portfolio, the country's largest energy efficiency program.
- Provide administrative support in managing contracts or projects. Compile statistics from public filings. Aid in the development of reports, workshops, webpage content, fact sheets, brochures, or other written deliverables.

### **Key Background Resources to Learn More about the Work of the Energy Division:**

- **CPUC Annual Report, Energy Division (p.18+)** <http://docs.cpuc.ca.gov/published/Graphics/113170.PDF>
- **Energy Action Plan II:** <http://www.cpuc.ca.gov/PUC/energy/Resources/Energy+Action+Plan/>

### **Intern Requirements**

- Interns must be a registered student, either college-level or graduate-level.
- Interns work full-time or part-time on-site at the CPUC Headquarters. Minimum of 10 hours per week in school year, and 40 hours per week in summer.
- Interns may be summer-only, or school-year. Summer start and end dates are flexible.
- Candidates studying public policy, economics, financial analysis, law, or engineering.
- Candidates with specific knowledge in energy efficiency, demand response, renewable energy, solar energy, climate change or clean energy policies and programs are preferred.
- Excellent analytical skills, both qualitative and quantitative.
- Ability to work in fast-paced environment with other team members.
- Excellent oral and written communication and interpersonal skills.
- Requires minimal supervision and takes initiative.
- High performer and outcome-oriented.
- Flexibility.

### **Internship Location**

These internship positions are located in San Francisco, California, at the CPUC's headquarters.

### **Hiring Process**

Applications are due April 15, 2010, but applications may be reviewed as they are received, and qualified applicants will be contacted for an interview. Writing samples may also be required. Applicants invited for an interview will be required to fill out a Standard State of California job application (<https://forms.spb.ca.gov/employment/>), but applicants are not required to Submit a Std. Form 678 until requested.

### **Student Assistant Pay Range**

Student assistant pay ranges are dependent on level of education, see attached pay range descriptions.

### **Application Information**

Please email a copy of your resume and cover letter to the CPUC by April 15, 2010.

Cover Letter Must include: (1) Your preferred internship dates (or state if you are flexible), (2) Your preferred Intern Work Areas, (3) Your qualifications for an internship, (4) your reasons for an interest in an internship at the CPUC, and (5) Your current school, area of study and expected graduation date.

**Please email your information to:**

**Full Time Job Information for Regulatory Analyst Positions**

Information on full-time CPUC job opportunities can be found here:

<http://www.cpuc.ca.gov/PUC/jobs/> Future employment opportunities may include positions for engineers, financial examiners, attorneys, and administrative personnel.

For Analyst Positions:

To apply for a full-time job, you must first apply to take the Public Utilities Regulatory Analyst (PURA) examination. The PURA examination is offered at 5 levels (I, II, III, IV, and V). As of March 2010, the CPUC is not offering the PURA Level I examination, but it may be offering the exam again in the future. The other examinations are currently available and eligible candidates may apply. Fill out the PURA Exam Application from the CPUC website at:

<https://emp.cpuc.ca.gov/joblistings.aspx> . Once a candidate has taken one of the exams listed above and been placed on an "eligibility" list, candidates who are top-ranked can apply for currently open "Job Opportunity Notices" ("open positions") in the Energy Division.
