

Michael Clayton & Associates

A **visual simulation** of the Partial Underground Alternative through the Sun Lakes Development as viewed from Key Viewpoint 6 on Pine Valley Road. This view is to the east-northeast along the route as it passes through the residential development and gold course. The Partial Underground Alternative would result in the removal of the existing wood pole H-frame transmission line (see Figure D.12-7A) and placement of the new subtransmission line underground along the same right-of-way.
