

**A** The **existing view** to the north-northwest toward the Mill Creek Communications Site, from Key Viewpoint 9 on Carter Street, just west of Fremont Street in the City of Yucaipa. The ridgelines to the north are natural appearing and are absent any apparent built structures.

**B** The image presents a **photosimulation** of that portion of the proposed Mill Creek Communications site that would be visible from Yucaipa. The simulation shows the proposed tower and antennas that would be slightly visible above the ridge line at a distance of two miles.
