

A **visual simulation** of the Proposed Project from Key Viewpoint 6 on Pine Valley Road, in the Sun Lakes residential and golf development. This view is to the east-northeast along the route as it passes through the residential development and golf course. The proposed transmission structures would be prominently visible from residences along the golf course, golfers on the course, and travelers on the local streets spanned by the transmission line. This view is typical of project views within the Sun Lakes Development.
