Subject: Edison Powerlines

Dear Ms.Mosley,

My wife and I are residents of the Sun Lakes Country Club Estates in Banning. The Edison Company is in the process of trying to update its powerlines across our community and golf course. We feel, as many Sun Lakers do, that these powerlines should be placed underground. An underground installation would not only be more asthetically pleasing but also would lessen any potential health problems for our residents.

C10-1

Thank you for your consideration,

Larry and Christine Cobel

Responses to Comment Set C10 – Larry and Christine Cobel

- C10-1** Your support for the Partial Underground Alternative has been noted. The Environmentally Superior Alternative has been re-evaluated and is identified in the Recirculated Draft EIR, Section E (July 2008) as the Proposed Project. Please see General Response GR-1 for a discussion regarding the change in determination of the Environmentally Superior Alternative. Please also see original Draft EIR (December 2007) Sections D.7 (Hazards and Hazardous Materials) and D.12 (Visual Resources) regarding health and aesthetic concerns.
