TO WHOM IT MAY CONCERN

To me and my Husband it is vitally important for the Health and Safety of our community, that the purposed Electrical Lines be PUT UNDERGROUND. All of our other services are under ground and the appearance of the unsightly poles and lines in the middle of our community is very disturbing.

We also have a lot of high winds and the possibility of downed wires all across our community could be devastating. We have a total of 3274 homes with over 5000 Residents and with the new building that is being done we are left with no private way of leaving our community and in case of a devastating fire it could be a very serious problem and cost a LOT MORE than putting the wires underground. the lines run very close to quite a few homes and are a danger. Please consider this seriously before you go ahead with your plans. We have a lovely community here and very proud of it and would like for you to be considerate of the people living close to the lines and all of our community.

Sincerely

Bill & Enid Porter

## Responses to Comment Set C41 – Bill and Enid Porter

- C41-1** Please see Draft EIR Section D.7 (Hazards and Hazardous Materials) for a discussion of fire hazards, and Section D.12 (Visual Resources) for a discussion of aesthetic impacts. Your support for the Partial Underground Alternative has been noted. The Environmentally Superior Alternative has been re-evaluated and is identified in the Recirculated Draft EIR, Section E (July 2008) as the Proposed Project. Please see General Response GR-1 for a discussion regarding the change in determination of the Environmentally Superior Alternative.
