**To:** E ICasco  
**Subject:** Power Lines

Our House is located just over the fence from the power lines currently installed.  
We have had earthquakes that move the poles like trees going over in a heavy rain.  
We get heavy winds every year in Banning and our lines are in the wind tunnel  
Banning gets no use from these lines as we have our own supply.

We encourage you to place the lines underground to avoid any unnecessary concern or tragedy.

Have a Happy Day

C51-1

## Responses to Comment Set C51 – George J. Tod

- C51-1** Your support for the Partial Underground Alternative has been noted. The Environmentally Superior Alternative has been re-evaluated and is identified in the Recirculated Draft EIR, Section E (July 2008) as the Proposed Project. Please see General Response GR-1 for a discussion regarding the change in determination of the Environmentally Superior Alternative. Please also see original Draft EIR (December 2007) Section D.7 (Hazards and Hazardous Materials) regarding wind hazards.
