RECEIVED JAN 25 2008

Jurdynna Masley, CPUC Project Manager
California Public Utility Commission
505 Van Ness Avenue
San Francisco, CA 94102

Dear Sirs:

The CPUC has recommended that the Edison power lines be placed underground for one mile through the San Lucas Country Club golf courses. It is recommended for safety and aesthetic reasons. We are worried about the safety concerns and the lines will be on 100% of the time.

Yours truly,
Dale & Phyllis Leeper
1546 Masters Dr.
Banning, Ca. 92220

C52-1

Responses to Comment Set C52 – Dale and Phyllis Leeper

- C52-1** Please note that placement of the subtransmission line underground is not a recommendation by the EIR authors or CPUC Project Staff. The final decision on the alternative that will be approved is up to the vote of the five-member California Public Utilities Commission subsequent to the certification of the Final EIR. Your support for the Partial Underground Alternative has been noted. The Environmentally Superior Alternative has been re-evaluated and is identified in the Recirculated Draft EIR, Section E (July 2008) as the Proposed Project. Please see General Response GR-1 for a discussion regarding the change in determination of the Environmentally Superior Alternative. Also, please see original Draft EIR (December 2007) Sections D.7 (Hazards and Hazardous Materials) and D.12 (Visual Resources) regarding safety and aesthetic concerns.
