

Comment Set D0140  
Myrna Wosk

February 26, 2008

Judge, Commissioner. . I am Myrna Wosk, and I thank you for slogging through all of this with us. I absolutely support your #1 choice and I'm totally opposed to the Powerlink.

D0140-1

Here's the scenario as I see it.

D0140-2

Sempra trots over to Indonesia and Russia or wherever and signs a bunch of contracts to purchase natural gas. Then they build huge structures to dig down beneath the ocean floor --probably not using Energy Star approved methods, to extract the gas. Then they have to transform it into something that can be loaded onto giant tankers, also not Energy Star winners. . .schlepp it all the way across the ocean, thousands of miles to . . .guess what. . .

LNG terminals conveniently already built in Northern Baja, where the gas, in some form, is piped up to MexiCali. Mexi..... Cali . .right on the other side of Our border, where it will be transmogrified once again, and probably not with full Energy Star Compliance, into energy that can be transmitted over . . .guess what. . .

enormous lines, which they are hoping you will approve. . .and sending all of this energy WHERE? in large part, NORTH of San Diego County, and I refer you to Bill Powers' Smart Energy 2020 Plan which spells it out precisely.

So I say, blessings on Stirling Energy and Sempra too, and let them put their knowledge and their expertise into locally produced sources of energy. . .and as for power plants. . .if they're designed not only for the highest efficiency, but with an eyes for aesthetics and lines underground. . .well, I wouldn't mind having one in my figurative back yard.

D0140-3

Last point: we're trying to get off our dependency on foreign oil. Do we want to become dependent on foreign natural gas?

D0140-4

Please, dont let anything deter you from the sensible #1 choice you have already made.

Thank you,

Myrna Wosk

## Responses to Comment Set D0140 Myrna Wosk

- D0140-1      The commenter's support for the New In-Area All-Source Alternative and opposition to the Proposed Project is acknowledged.
- D0140-2      The commenter's views and concerns regarding LNG importation from Mexico are acknowledged. Please see General Response GR-7 regarding the Sunrise Powerlink Project connection to Mexican energy generation and LNG import. No further response is required because the comment does not address significant environmental issues.
- D0140-3      The commenter suggests Stirling Energy and Sempra should apply their knowledge and expertise to locally produced sources of energy including local power plants that are designed with high efficiency and aesthetic values. This suggestion is acknowledged. No further response is required because the comment does not address significant environmental issues.
- D0140-4      The commenter's concern about dependence on foreign natural gas is acknowledged. Please see Response to Comment D0140-2.
