

Michael Clayton & Associates

The **existing view** to the south-southeast toward the Proposed Project, from Kenyon Overlook, off of Yaqui Pass Road. This panoramic view looks out over Mescal Bajada to the Vallecito Mountains beyond. SR 78 is visible as a horizontal line across the center of the image. The Proposed Project would generally parallel SR 78 on the north side (below in the image) and just north of a wood-pole utility line (the brown wood poles are just barely visible in the image along SR 78).
