

Michael Clayton & Associates

A **visual simulation** of the Proposed Project from Key Viewpoint 14 on southbound SR 79, approximately 2.25 miles south of the intersection with San Felipe Road (S2). This view is to the south toward proposed structures C77 (closest) through C73. The proposed structures and new access road would be prominently visible from SR 79 and would introduce industrial character and visual contrast into the predominantly rural landscape. The structures and conductors would also cause substantial view blockage of the background hills, ridgelines, and sky (as a result of skylining).
