

Michael Clayton & Associates

The **existing view** to the north from Key Viewpoint 29 on northbound Huff Road, just north of the span of Huff Road. This view encompasses a portion of the route that the West Main Canal-Huff Road Alternative would follow. This route segment would be located adjacent and to the east (right) of the road. As shown in the image above, the landscape is predominantly agricultural with some vertical built features (wood utility poles). The Superstition Hills are visible in the background.
