RE: Sunrise Powerlink Project – Mitigation Measure Compliance
Mitigation Measure BIO-APM-18 Task 1 for Sunrise Powerlink Transmission Project

Ms. Coronado:

Project structures and work areas were taken into consideration during the design of the alignment to avoid sensitive features to the extent feasible. Sensitive features identified during surveys performed for the Final Environmental Impact Statement/Environmental Impact Report and the Project Modification Report (PMR) were evaluated and designs were adjusted where feasible. The April 30, 2010 Mapbook and PMR illustrates these changes to the final design of the alignment with an overall reduction of impacts to sensitive features and a redesign of the alignment to be relocated to previously disturbed areas when feasible. A revised Mapbook and PMR were submitted to the CPUC on May 14, 2010.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Jonathan Woldemariam', is written over a horizontal line.

Jonathan Woldemariam, Manager – Engineering & Procurement
