RE: Sunrise Powerlink Project – Mitigation Measure Compliance
Mitigation Measure LU-APM-5 for Sunrise Powerlink Transmission Project

Ms. Coronado:

San Diego Gas & Electric, Co. (SDG&E) consulted with water management representatives to remedy encroachment and safety conflicts with irrigation canals and flood management structures. SDG&E provided Technical Drawing and Plan & Profiles on August 27, 2009 that detail work near box culverts, storm drains and sewer systems along Alpine Boulevard. SDG&E met and consulted with a representative from the County of San Diego, Ken Brazell, on multiple occasions starting as early as October 7, 2009 to discuss the previously submitted Drawings and Plan and Profiles as well as construction of the Alpine Bridge Attachment over Viejas Creek.

Sincerely,

A handwritten signature in black ink, appearing to read "Jose Lopez", written over a set of horizontal lines.

Jose Lopez, Project Manager – 230 kV Underground

Cc: Alan Colton, Manager – Environmental Services
