Comment: I recently read comments on SDG+E's proposed Sunrise Powerlink Project by The Sierra Club. The San Diego Chapter of The Sierra Club is planning to submit an energy plan that, the outdated transmission line proposed by SDG+E is not needed. Not only that, SDG+E has spent a lot of money so far, just in making maps + surveying, making engineering studies and publicizing the project; but it's nothing compared to what the installation of huge windmills, generators and power poles will cost. Undergrounding is the modern way, but so far SDG+E hasn't been very successful in that respect either. I hope you will turn down this project that will enable SDG+E to litter our beautiful Anza Borrego desert State park + Cleveland National Forest with power lines. We need a better way.

Sincerely, Adeline Mullen

Comment: I favor the 'Non Wire Alternatives' & I think that neighbourhood PV stations should be approved & encouraged with tax & other financial aid.

Bringing solar-generative power with high overhead lines is an environmental crime plus I believe the electrical line loss for 150 miles makes it ridiculous since the sun shines almost as much here in North County

I also wonder if the sale of the Encino Power Station wasn't part the Energy Scam of recent years - it should have just been upgraded as necessary - the Attorney General should look into this.

Since California is the 7th largest global economy, it should discontinue "3rd World" electrical distribution systems

Subject: Sunrise Powerlink

Dear Billie Blanchard,

Feb. 5, 2007

Since I now live in Indiana, I learned of the renewed attempt to build high transmission powers lines across the Anza Boreggo Desert State Park only recently. My husband and I are still opposed to such construction.

I have had a long love of the Anza-Borrego. It began when I was a child in San Diego and my parents, sister and I would go out to the desert at every opportunity in the late 1930's. When we returned home to San Diego after the WWII, my mother, sister and I renewed our visits. My father did not survive the war.

After I was married, the State Park became the favorite winter camping destination for my husband, two children and me in the 60's. During that time, we joined the Sierra

Club

and I became active with the conservation committee of the San Diego Chapter. Also during that time, Harriet Allen, Joe Read, Doc Parker, Jim Whitehead, myself and others formed the Anza-Borrego Committee. I was, also, for many years Membership secretary for the Desert Protective Council.

During the late 60's, San Diego Gas & Electric contacted the SD Chapter conservation committee regarding the building of high power transmission lines across the Anza – Borrego State Park. I think they hoped to get our support of the endeavor. Mr. Sinnott, then president of SDG&E, sent Frank Devore to meet with us. He tried everything, including a lunch with Mr. Sinnott in the SDG&E executive dining room. Frank Devore, also , told me that SDG&E would paint the towers any color we wanted. I guess he thought that since there were many women in the Conservation Committee, that designer colors would sway us. However, they did not and the San Diego Chapter remained opposed. We did not oppose building the lines around the bottom of the Park out side the boundary line at the time. The matter seemed to go away.

Now the specter of high power transmission line across the State Park has again risen its ugly head. My husband and I are completely opposed to the Sunrise Powerlink plans, as we were to SDG&E plans in the past. De-designation of wilderness in a State Park should never be allowed for development of any kind, private or otherwise.

This is a long e-mail, but I wanted you to know that I'm not just a Hoosier butt-in-sky. I may not be in California any longer but my love of the Anza-Borrego remains.

Thank you, Berna Rasmussen b.j.rasmussen@att.net

Comment: We live in Holly Oak Ranch, a community adjacent to the proposed Powerlink Project. Other residents and I strongly disagree with the decision to not put the power line underground at the Barnett Ranch Open Space Preserve. While the construction process may be damaging to the eco system at first, in the long run any damage could be repaired and restored. Additionally, residents would not have to be at risk of any unknown health consequences in the future. Other acceptable options would be placing the powerlines south of the Barnett Preserve where there are no homes, or using the interstate 8 alternative.

Comment: I have heard little mention about the impacts on cultural resources. On all alternatives.

Cultural resources, historic and prehistoric, are non-renewable resources.

I would ask what mitigation is proposed for the countless archaeological sites which will undoubtedly be impacted?

Comment: The need for an additional/ major transmission line to San Diego County has not been demonstrated. Additional power needs can be met by in basin generation development at less economic & social cost. San Diego County residents' are nearly unanimous ~~to~~ in opposition to another transmission line. The only parties who favor the project are San Diego GAS & Electric Company and other utility and business interests who stand to benefit. The value of our open spaces & homes far outweigh the potential benefit of this project.

Comment: The mapping is obscure and not clear for property owners to pinpoint sites on. The meetings for C.P.U.C. on their websites are not accurate on locations. Many owners don't know about this. In the "D" Route are Arroyo Toad, Flannel Bush (all Endangered listing) and "Rare Hermes Copper Butterfly". We also have in the southwestern corner of the Cleveland National Forest (our property of concern parcel 602-020-08) the Gnatcatcher, Least Bell's Vireo, Southwestern Flycatcher, also the rare Tecate Cypress. We are in the drainage to Barret Lake. Many species of special concern. The 300ft R.O.W. is not compliant to The 5 year plans for the Cleveland N.F.

Comment: MIGHT THE "D" ROUTE NORTH OF BARRET LAKE SUB-STATION USE MILK RANCH ROAD TO REACH JAPUTAC VALLEY ROAD?

I HAVE 9 ACRES UNDER THE EXISTING 69 KV LINE, BETWEEN SPICE WAY AND THYME WAY. YOUR ALTERNATIVE LIGHT BLUE LINE TO THE EAST IS BETTER THAN EXPANDING THE EXISTING 69 KV LINE. THE PROPERTY IS JUST NORTH OF THE BARRET LAKE SUB-STATION.

CURRENTLY, THERE ARE SEVEN STATES THAT ALLOW ELECTRICAL CUSTOMERS TO PUT POWER BACK INTO THE SYSTEM. WHEN WILL CALIFORNIA JOIN THE SEVEN? WHO DECIDES? C.P.U.C.? SDGE?

Subject: Public Comment

Dear CPUC, US BLM, & Aspen Eng:

Re: Sunrise Powerlink, Coastal Link

Its extremely disappointing that CalTrans can reject a route alternative along State Route 56 (aka Ted Williams Parkway) without reasonable consideration. Taxpayers have invested millions of dollars in the environmental impact analysis of putting this roadway in place and we would like to leverage that investment by routing the coastal link along that roadway instead of through Los Penasquitos Canyon Preserve and the Rancho Penasquitos residential areas.

Taxpayers get burned when a taxpayer funded state agency rejects powerlink alternative routes by forcing essentially pristine preserve areas to be used for underground transmission lines. We lose use of these preserve areas during construction, and we pay twice for the environmental impact analysis.

I request that the routing alternative proposal along State Route 56 be escalated to the highest levels of state government for consideration, including the Governor's office.

Regards,

Glenn Hachadorian

Comment: You can not allow SDG&E to dig up the street
you are causing a very large traffic problem also a
route for emergency vehicles. Once you let SDG&E in one
under ground route then they will add towers. Choppers cannot
land where there are wires. Put it all under ground or
no at all. We at the meeting all agreed that power
in San Diego should be the best way and the cheapest,
and most reliable is to use same wires + provide panels
for roofs or lots, then feed it back. The only people
who think that we need the power line is the ones
that will make the most money. Our rates will
not be lower. SDG&E has a monopoly and this
is illegal to start. We have no where else to
get power from; and if we put panels on the roofs

Comment: I am letting you know that I feel this S.D.G&E Sunrise powerlink Project is wrong. Project Figure 8 that runs through Dehesa, Crest and Harlison Canyon one of the many alternatives projects. We live in a very Canyon steep area, that has been hit by many wild fires over the years. We lost two homes in the 2003 Cedar fire, just rebuilt one after fight with insurance Company, then the County. But, for the first time in a long time our area is invited to fight any battle we must. We will live with what ever we must because we again don't get much of a voice. I hope that you think about us the next time we need fire aid from the air and we will not get it!
*Please print. Your name, address, and comments become public information and may be released to interested parties if requested.
Maybe, you'll give to Red Cross so you'll feel better!
