This image presents a **Visual Simulation** of the Proposed Project with FAA Hazard Marker Balls added to conductor spans, as preliminarily determined by SCE, and viewed from **KOP 4** on **San Timoteo Canyon Road**. For shorter conductor spans needing three or fewer marker balls, the marker balls are all aviation orange in color. Longer spans utilize alternating colors of orange, white, and yellow. A final determination of the spans needing marker balls will be made by the FAA once final engineering is complete.
