This image presents the **Existing View** to the north, from **KOP 18** on **Iowa Street**, in the City of Redlands. This view encompasses a portion of the Proposed SB-Redlands-Tennessee overhead 66 kV subtransmission line as it passes the Cottage Lane residential subdivision to the east. While there are no dominant overhead utility structures apparent in this suburban landscape, there are single-, wood-pole utility lines along Orange Avenue and a portion of Iowa Street. Also visible is a communication tower.
