

This image presents a **Visual Simulation** of the **Proposed Project plus a Future 500 kV Transmission Line** (cumulative project) from **KOP 13**, on **Haugen-Lehman Way**, just south of Amethyst Drive, in the residential community of Whitewater. This simulation illustrates the addition of a future 500 kV tubular steel pole transmission line adjacent and to the north of the Proposed Project in the existing ROW. The 500 kV structures would be noticeably taller and would appear somewhat more massive.
