Re: CPUC Review of Proponent's Environmental Assessment for Southern California Edison Company's Circle City Substation and Mira Loma-Jefferson Subtransmission Line Project

Dear Mr. Horne:

The California Public Utilities Commission (CPUC) Energy Division CEQA Unit has conducted a review of SCE's Proponent's Environmental Assessment (PEA) for the Circle City Substation and Mira Loma-Jefferson Subtransmission Line Project (Project) relative to the CPUC's PEA Checklist for Transmission Line Projects (October 7, 2008). The Energy Division finds that the PEA contains sufficient information to satisfy the requirements of the Commission's Information and Criteria List and deems the application complete.

Please note that the Energy Division will request additional data, as necessary, to prepare a complete and adequate analysis of the potential environmental effects of the Project in accordance with the requirements of CEQA.

Please do not hesitate to call me at (415) 703-2168 if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Connie Chen", with a stylized flourish at the end.

Connie Chen, Project Manager
Energy Division
