## Concerns about alternative #3 route for power line

To whom it may concerns,

I live in Spindletop Rd, in Park Village neighborhood, San Diego. Recently, I have found that there are five alternative routes for the 230KV powerline, and looks like one of the alternatives (alternative #3) is only few feet far from my house!

I have serious concerns about: 1. health related issues 2. constructions that would block the only exit of the neighborhood 3. the impact on the elementary school that my daughter is attending in. **I am completely against route alternative #3, which goes through Park Village Rd in PQ.**

Alternative #5 could be more reasonable and I prefer that one.

I hope that my objection and all other residents of my neighborhood objections are taken completely into consideration in the final review and decision.

Best Regards,  
M. K. Nasab
