Hi,

As a resident close to Park Village Road, I strongly oppose Alternative #3 for the Sycamore-Penasquitos 230kV Transmission Line Project. Here are my concerns:

1. The line is close to our public school and on our way walking to elementary school. The perceived EM radiation affects our children.
2. The 10-month construction will affect us. The construction noise, air quality, and road hazards will have a huge impact on our life. Park Village Road is the only way out for PV residents. And what if there is any emergency, such as a fire emergency? Our kids walking to school through Park Village Road, I'm afraid the construction will be a hazard to them.
3. And Park Village is already in a Very High Fire Hazard Severity Zone. I strongly suspect the transmission line will increase the possibility of fires.

Thanks,
Zilin Ying
