The California Public Utilities Commission (CPUC) wants to hear from you. A Public Participation Hearing (PPH) has been scheduled for customers in the Dixon District at the date, time, and location noted above to receive your comments about California Water Service's (Cal Water) 2018 General Rate Case (GRC) application (A.18-07-001). Cal Water is requesting total company revenue increases of \$50,673,500 (or 7.6%) for 2020, \$31,461,900 (or 4.4%) for 2021, and \$33,000,700 (or 4.4%) for 2022. If approved by the CPUC, rates would change beginning in January 2020. A CPUC Administrative Law Judge (Judge) will preside at the PPH to listen to concerns, comments, and opinions on the proposed application. One or more CPUC Commissioners may attend, but **no decisions will be reached at the PPH**. All public comments from the PPH will be included in the formal record and become public record.

The hearing location is wheelchair accessible. If you need a non-English language interpreter or special assistance, please contact the CPUC's Public Advisor's Office (PAO) at the address listed at the bottom of this notice at least five days in advance of the hearing date. If you cannot attend the PPH, you may submit your comments via a letter or email to the PAO.

The Application

Every three years, Cal Water is required to file a GRC with the CPUC. On July 2, 2018, Cal Water filed its 2018 GRC application (A.18-07-001) requesting approval to increase rates so that water rates reflect the cost of providing water service. Also included in A.18-07-001 is Cal Water's proposal to merge the costs of its Dixon and Stockton Districts. This cost consolidation will improve affordability and administrative efficiencies.

With Cost Consolidation - If this consolidation is approved by the CPUC as proposed, Cal Water requests an overall revenue increase of \$618,121 (or 18.7%) for Dixon customers over three years, as shown in the table below

Proposed Revenue Increases for Dixon Customers with Consolidation

2018 Revenue Requirement	Proposed 2020 Revenue Increase	Proposed 2021 Revenue Increase	Proposed 2022 Revenue Increase

*Nonresidential Metered Service applies to all customer classes that are not residential (such as business, multi-family, and public authority customers) and do not have a separate tariff. **The sum of residential and nonresidential revenues will not equal total revenue due to other revenue sources like construction meter charges, fire protection services, and recycled water.

Without Consolidation - If consolidation is not approved by the CPUC as proposed, Cal Water requests an overall revenue increase of \$2,019,174 (or 61.2%) for Dixon customers over three years, as shown in the table below.

Typical Customer Impact

The following table details the increase a typical residential customer with a 5/8"x 3/4" meter would see in their bill if Cal Water's proposed rates for 2020, 2021, and 2022 are approved by the CPUC as requested. In 2017, the average residential customer with a 5/8"x 3/4" meter used 10 Ccf (7,480 gallons) of water per month. **These numbers do not include temporary surcharges and credits.**

Key Reasons for Increase

Cal Water has been providing water utility service to California communities for more than 90 years, and many of the facilities used for water service have reached the end of their useful lives. Some of the key reasons Cal Water is making this request is to:

- Continue to invest in infrastructure to enhance safety and reliability, and to manage risks that could impact customers and/or fire protection systems;
- Meet water quality and environmental regulatory requirements; and
- Secure water supplies to ensure future reliability.
