

REVITALIZING

the **Clean Energy Economy**

Just a few years ago, the U.S. appeared to have the ability and the will to become a global leader in the transition to a clean energy economy, with California at the forefront. However, various political and economic events may have slowed that momentum.

This panel discussion will identify new potential government policies and private sector strategies in California for reducing greenhouse gas emissions to 1990 levels by 2020.
