

California Public Utilities Commission
Thought Leaders Series

CPUC Division of Policy and Planning Presents
California's Green Economy

David Roland-Holst

Tracey Grose

F. Noel Perry

A panel discussion moderated by CPUC's Senior Policy Analyst, Kristin Ralff Douglas, to discuss and answer:

- **Why is clean energy a smart economic stimulus?**
- **How is California a model for other states in energy efficiency?**
- **How will energy efficiency create jobs in California?**

Wednesday, June 10, 2009
1 p.m. to 2:30 p.m.
CPUC Auditorium

This is the next special event in the Thought Leaders speakers series presented on challenges facing the CPUC as it regulates industries in communications, energy, transportation, and water in the 21st Century.

F. Noel Perry – Founder of Next 10 and Creator of the 2009 California Green Innovation Index

Tracey Grose – Vice President for Research and Strategic Development for Collaborative Economics, Incorporated

David Roland-Holst, Ph.D. Economics – Professor in the Department of Agricultural and Resource Economics at the University of California, Berkeley and author of three books and 100 articles.

Free and Open to the Public.
