**2:00 - 2:30 p.m.**

#### Public Input Period

## Broadband ARRA Workshop

The Broadband American Recovery and Reinvestment Act (ARRA) workshop will provide an overview of the Broadband Technologies Opportunity Program (BTOP) and the Broadband Initiatives Program (BIP) Notice of Funding Availabilities (NOFA). The workshop will also present ideas on how the State of California will review ARRA broadband applications in light of the NOFA, as well as requirements for obtaining matching funds from existing California broadband programs, the California Advanced Services Fund and the California Emerging Technology Fund. There will be an opportunity for public input with regard to California's role in the grant process and California matching fund processes. Questions about the BTOP/BIP NOFAs should be directed to NTIA and RUS at the contacts listed in the NOFA.

The workshop also will include an overview of the NOFA released by NTIA on the Broadband Data Improvement Act (BDIA), relating to broadband mapping. The workshop will discuss how the State will gather broadband data, and will provide a time for public input.
