

California Role in Grant Process

Joe Camicia
Chief of Staff

Office of the Chief Information Officer,
State of California

July 10 and 13, 2009

California Role in Process

- California asks that applicants for BTOP funds should submit a copy of their applications to the California website on recovery activities at the same time it submits them to NTIA at the following website:
 - <http://www.recovery.ca.gov/>
 - Submission of the applications to the California recovery website will enable the Governor's Office to provide timely input on the applications to NTIA.
 - The Chief Information Officer will review these applications with assistance from California PUC and California Emerging Technology Fund.

Time Frame for State Review

- NTIA will send to the state's Governor a list of eligible applicants after Step 1 of the BTOP application review.
 - Governor has 20 days to make recommendations on the list of potential awardees to federal agencies.
 - State is encouraged to provide mapping and planning data in support of its recommendations.
 - We believe NTIA request will not occur before Sept. 14, 2009.
