Cal Water's Application—Every three years, Cal Water is required to file a GRC with the CPUC to ensure water rates reflect the cost of providing water service. On July 9, 2015, Cal Water filed its 2015 GRC application requesting approval to increase rates overall by \$94,838,100 (or 16.5%) in 2017, \$22,959,600 (or 3.4%) in 2018, and \$22,588,200 (or 3.3%) in 2019. Also included in A.15-07-015 is Cal Water's proposal to gradually merge the costs of the King City and Salinas Districts to improve affordability and develop administrative efficiencies.

A. With Cost Consolidation – If this consolidation is approved by the CPUC as proposed, the portion of the requested revenue change for King City customers would be -\$44,000 (or -1.3%) for 2017, \$147,000 (or 4.5%) for 2018, and \$146,000 (or 4.3%) for 2019. With consolidation, the total revenue increase over the three years for the King City District would be \$248,000 (or 7.6%).

King City Revenue Changes with Consolidation

<i>Type of Service Provided</i>	<i>2017 Change</i>		<i>2018 Increase</i>		<i>2019 Increase</i>	
Residential Metered Service	\$ (76,000)	-4.5%	\$73,000	4.5%	\$72,000	4.3%
Nonresidential Metered Service*	\$32,000	2.0%	\$74,000	4.5%	\$74,000	4.3%

*Nonresidential Metered Service applies to all customer classes that are not residential (such as business, multi-family, and public authority customers) and do not have a separate tariff.

Typical Customer Impact with Consolidation – If Cal Water's proposed consolidation of the King City and Salinas Districts is approved, the bills for a typical residential customer in King City with a 5/8" x 3/4" meter using 9,725 gallons (13 CCF) of water per month would resemble those below. **These numbers do not include surcharges and credits, except the RSF credit.**

Reasons for Increase-Cal Water has been providing water to California communities for nearly 90 years, and many of the facilities used for water service have reached the end of their useful lives. For the King City District, most of Cal Water’s requested revenue increases are made up of the following components:

- Projected water supply costs (5.9%)
- Water infrastructure improvements (73.8%)
- Projected operation and maintenance expenses (20.2%)

Cal Water’s proposed rates for 2017-2019 would become effective on January 1, 2017. The rate increases for 2018 and 2019 are calculated using the most recent inflation factors provided by the CPUC. The CPUC requires that Cal Water use a simplified, inflation-based, escalation methodology for its proposed rates for 2018 and 2019.

Obtaining a Copy of the Application-A copy of Cal Water’s proposed GRC application and related exhibits may be reviewed at Cal Water’s office, located at 1301 Broadway Street, Suite A-3, King City, CA 93930, (831) 385-5486. An electronic or paper copy of the application and related exhibits will be provided by Cal Water upon written request to California Water Service Company, 1720 North First Street, San Jose, CA 95112-4598. Copies are also available to review at the CPUC’s Central Files Office in San Francisco by appointment. For more information, please contact them at ajlcentralfilesid@cpuc.ca.gov or (415) 703-2045.

The CPUC’s Process-After considering all proposals and all evidence presented during the formal hearing process, the Judge will issue a proposed decision determining whether to adopt Cal Water’s request, modify it, or deny it. Any of the CPUC’s Commissioners may sponsor an alternate decision. The proposed decision and any alternate decisions will be discussed and voted upon at a scheduled Commission Voting Meeting.
