

Bridging the Digital Divide

California Advanced Services Fund

What is the California Advanced Services Fund (CASF)?

The California Public Utilities Commission’s (CPUC) CASF provides grants to eligible applicants to increase broadband adoption and provide Internet access in underserved areas to bridge the “digital divide.” CASF’s goal is to provide broadband access to at least 98 percent of Californian households.

How does CASF Work?

CASF is funded by a fee collected by telecommunications companies from consumers. CASF provides grants through five accounts*:

Broadband Infrastructure Grant Account

Provides grants to deploy broadband to unserved households. Only unserved households are eligible for grants; an “unserved household” is one in which no facilities-based broadband provider offers service at speeds of at least 6 megabits (mbps) per second downstream and 1 mbps upstream.

REACH	PROJECTS AUTHORIZED	AUTHORIZED FUNDS	AWARDED FUNDS
50,000 households	77	\$570 million	\$270.70 million

Public Housing Account

Provides grants dedicated to broadband connectivity and adoption in publicly supported housing communities.

REACH	PROJECTS AUTHORIZED	AUTHORIZED FUNDS	AWARDED FUNDS
21,326 affordable housing units across 31 counties	323	\$25 million	\$14 million
