**Re: PSPS Post Event Report Regarding Pro-Active De-Energization Event  
September 21 to October 1, 2019**

Dear Director Palmer:

Southern California Edison (SCE) respectfully submits the attached report in compliance with PSPS Post Event Reporting requirements regarding its pro-active de-energization event that began September 21, 2019. This report has been verified by an Officer of SCE in accordance with Rule 1.11 of the Commission's Rules of Practice and Procedure.

Sincerely,

A handwritten signature in black ink that reads "Laura Genao / by KB".

Laura Genao  
Managing Director  
SCE State Regulatory Affairs

**Southern California Edison  
Public Safety Power Shutoff Protocol (PSPS)  
Post-Event Reporting in Compliance with Resolution ESRB-8  
and Decision 19-05-042  
September 21 to October 1, 2019**

**Submitted to:  
California Public Utilities Commission  
Director of the Safety and Enforcement Division  
October 15, 2019**

### **Executive Summary**

On September 21, 2019, Southern California Edison (SCE) activated its Emergency Operations Center and PSPS Incident Management Team to perform response operations associated with a weather event where forecasted high winds and low relative humidity levels were expected to create the potential for execution of SCE's Public Safety Power Shutoff (PSPS) protocol. Over the course of the event, potentially impacted customers were identified in Inyo, Kern, Los Angeles, Mono, Riverside, San Bernardino, Santa Barbara, Tulare and Tuolumne counties. The PSPS notifications team completed all required notifications to potentially impacted customers, emergency management agencies (county and state), and elected officials in areas which could be and/or were impacted. Pro-active de-energization was ultimately required for a portion of the Riverside County area and affected 85 customers.

SCE submits the following report to the California Public Utilities Commission's (CPUC) Director of the Safety and Enforcement Division (SED) pursuant to Resolution ESRB-8 and Decision (D.) 19-05-042. In separate sections of this report, SCE sets forth the reasons for its decision to notify customers of the potential for and execution of de-energization and includes an event summary and responses to the questions as required in post-event reporting.

### **SCE's Decision to Notify and De-Energize Customers**

SCE's decision to notify customers of a potential or actual utilization of the Public Safety Power Shutoff (PSPS) protocol was based on the following factors:

- National Weather Service (NWS) issued Red Flag Warnings for counties that contain SCE circuits in high fire risk areas;
- Assessments from SCE's in-house meteorologists about local weather conditions; sourced from strategically deployed weather stations (e.g. wind speeds, humidity, and temperature);
- Output from the SCE Fire Potential Index (FPI), which is a tool used to estimate wildfire potential based on actual weather and fuel conditions;
- Input from SCE's fire scientist on fire potential to include consideration of weather and fuels;
- Real-time situational awareness information from highly trained personnel positioned locally in high fire risk areas;
- Specific concerns from local and state fire authorities regarding the potential consequences of wildfires in select locations;
- Expected impact of de-energizing circuits on essential services such as public safety agencies, water pumps, traffic controls, etc.; and
- Other operational considerations to minimize potential wildfire ignitions.

Actions taken to manage the response included:

- Implemented operating restrictions on impacted circuits in impacted counties; <sup>1</sup>
- Activation of an Incident Management Team (IMT) for directing response operations associated with potential de-energization;
- Notifications to potentially impacted customers, emergency management agencies (county and state), and elected officials;
- Patrolling of impacted circuits before and after the event; and
- Live field observations of impacted circuits during the Period of Concern<sup>2</sup> to help inform the need to execute the Public Safety Power Shutoff Protocol to maintain public safety.

Additional details of the event leading to the decision to provide notifications and proactively de-energize can also be found in the report timeline below.

### **Event Summary September 21, 2019 to October 1, 2019**

On Saturday, September 21, SCE's Situational Awareness Center notified SCE's Business Resiliency Duty Manager and on-duty Incident Management personnel of forecasts predicting local winds with high gusts, warmer temperatures, and very dry conditions resulting in an Elevated Fire Weather Threat (EFWT) beginning on Monday, September 23. Initial 72-hour notifications were made to potentially impacted counties.

SCE activated its PSPS IMT on Sunday, September 22, to begin overseeing execution of the PSPS protocol. The IMT was activated through the evening of Tuesday, October 1. Throughout the 11-day event, nine counties were in scope for potential de-energization, impacting up to approximately 461,600 customers. The "Period of Concern Reports" in Appendix A contain reports for each day of the event.

On Sunday, September 22, SCE meteorologists forecasted Elevated Fire Weather threat for the Santa Barbara Mountains, South Coast, and LA and Ventura Counties for late Monday into early Wednesday. A Santa Ana wind event was expected to bring significant warming and drying to much of the region, with warmest valley areas expected to exceed 100 degrees. The Southern Sierras were forecasted to have occasional wind gusts up to 60 MPH.

SCE territory expected an Elevated Fire Weather threat for Tuesday with Santa Ana wind gusts were forecasted to reach 50 MPH in the Southern California Mountains with relative humidity at around 10%. Winds were expected to peak during the Tuesday afternoon hours. The warning cited the potential for rapid spread of wildfire and extreme fire behavior that would lead to a threat to life and property if an ignition occurred on Tuesday.

On Tuesday, September 24, the IMT closely monitored weather models, real-time weather stations, and received real-time information from live field observers throughout the day. Based on these real-time interactions, the IC was able to refine the event start time and made the decision to initiate the PSPS de-energization protocol.

The Saddleback and Dysart Circuits in Riverside County were proactively de-energized on September 24 as outlined below:

- The Saddleback 33kV Circuit out of Banning Substation in the unincorporated cities of Banning and Beaumont was proactively de-energized at 2:46 p.m. A total of nine customers, mostly residential were affected, with no Critical Care or essential service provider customers impacted. After winds abated, appropriate re-energization protocols were implemented, and power was restored same day at 8:34 p.m.
- The Dysart 12kV Circuit out of Banning Substation, downstream from Saddleback, in the unincorporated cities of Banning and Beaumont was proactively de-energized at 2:46 p.m. A total of 76 customers, mostly residential were affected, with no Critical Care or essential service provider customers impacted. After winds abated, appropriate re-

energization protocols were implemented, and power was restored same day at 8:34 p.m.

Additionally, on Tuesday, September 24, 2:25 p.m., the Bear Valley Circuit in San Bernardino County relayed. Since the Bear Valley Circuit was on the Monitored Circuit List at the time, the circuit needed to be patrolled before re-energization could occur. A portion of the circuit was re-energized at 8:25 p.m., and the circuit was fully re-energized on Wednesday, September 25 at 11:31 a.m.

A low-pressure system moved in on Wednesday, September 25 and Thursday, September 26, which resulted in periodic showers and scattered thunderstorms across much of the SCE territory. The increased humidity decreased fire concerns in most areas.

On Friday, September 27, the NWS issued a Red Flag Warning for the Sierra front in Mono County from 11 a.m. to 11 p.m. for Saturday, September 28, with wind gusts up to 60 mph and relative humidity as low as 15%. However, during this time live field observers did not indicate that wind gusts in the vicinity of circuits necessitated de-energization, and no circuits were proactively de-energized.

Monday, September 30, at 1:31 p.m., unrelated to PSPS, the Autumn Circuit in Mono County relayed during live field observations. The relay operation also de-energized the downstream Falls Circuit. A field troubleman attributed the cause of the relay operation to third party tree trimmers dropping a limb on the Autumn line. After the Autumn Circuit's period of concern expired, the Autumn Circuit was patrolled, tested, and re-energized by 3:24 p.m.

Due to improved weather conditions and updated forecast analysis on Tuesday, October 1, SCE determined that no circuits were expected to meet PSPS criteria for at least the next three days, which satisfied SCE's internal protocols for de-mobilization. At 4:00 p.m., the decision was made to end the PSPS event and de-mobilize the PSPS IMT.

Throughout the event, all notifications to potentially impacted customers, emergency management agencies (county and state), and elected officials were made in accordance with notification protocols. See Appendix B for "Public Safety Partner Notifications" and Appendix C for "Customer Notifications."

**Response to ESRB-8 Requirements**

The following material addresses Resolution ESRB-8 requirements in each of the categories associated with notifications. Each of these categories is addressed in a separate section.

**1. The local communities’ representatives contacted prior to de-energization, the date on which they were contacted, and whether the areas affected by the de-energization are classified as Zone 1, Tier 2, or Tier 3 as per the definition in General Order 95, Rule 21.2-D**

SCE maintained ongoing communications with both unincorporated and incorporated communities affected throughout the duration of the weather event ending October 1, 2019, including the local community representatives. Appendix B, “Public Safety Partner Notifications,” includes the notifications that were sent to local community representatives during this event. The notifications were sent via SCE’s mass notification system to a comprehensive list of community contacts within each county. Additionally, PDF maps and electronic mapping files for affected areas were made accessible to all impacted areas at [www.sce.com/maps](http://www.sce.com/maps). SCE also routinely submitted the CalOES Public Safety Power Shutoff Notification Form to the State Warning Center as conditions changed. The following table illustrates when initial contact was made as required, and additional information is included in Appendix B of this report.

The areas affected by this event were classified as elevated Tier 2 and extreme Tier 3 fire-threat areas, as well as areas previously included in CAL FIRE’s Fire Hazard Severity Zone maps.

The following table illustrates when initial contact was made as required, and additional information is included in Appendix B of this report.

### Media Communications

SCE provided customers and the public with information on the potential PSPS via regular updates on sce.com. Customers were given the current status in specific cities and communities that would have been impacted by a PSPS and were also given safety tips and guidelines.

<b>Media Inquiries - September 21 – October 1, 2019</b>		
<b>Date</b>	<b>Outlet</b>	<b>Inquiry</b>
9/23/2019	KNX	Interview request on PSPS.
9/23/2019	KPCC	Interview request on PSPS- with A. Martinez.
9/23/2019	KFI	Interview request on PSPS- status update.

**2. If unable to provide customers with notice at least 2 hours prior to the de-energization event, provide an explanation in its report.**

Customers were provided with multiple notices prior to de-energization. Customers were provided with Initial (two-day) and Update (one-day) notifications per SCE PSPS protocol. When the decision was made to de-energize, customers were notified at the time power was de-energized and when power was restored. SCE notified all customers at least two hours prior to de-energization due to the real-time onset of increased fire conditions.

All notifications occurred with as much notice as possible given the fluctuations in forecasts.

**3. Summarize the number and nature of complaints received as the result of the de-energization event and include claims that are filed due to de-energization.**

As of October 1, SCE received a total of one complaint related to the PSPS event that took place between September 21, 2019 to October 1, 2019.

- Customer complained that notification was irrelevant. They live in the high desert and did not understand the need to cut power in high desert areas. Customer received standard PSPS notifications based on their associated at-risk circuit.
- No claims were filed due to de-energization during this event.

**4. Provide a detailed description of the steps taken to restore power.**

Once the elevated fire conditions abated, SCE immediately initiated post patrols, including the use of helicopters, to confirm the safety of the circuits that were de-energized. Once the patrols were completed and the circuits were deemed to be clear of any hazards, re-energization protocol was initiated. Both circuits that were proactively de-energized were re-energized by 8:34 p.m. on Tuesday, September 24.

**5. Identify the address of each community assistance location during a de-energization event, describe the location (in a building, a trailer, etc.), and describe the assistance available at each location, and give the days and hours that it was open.**

No community outreach vehicles were deployed during this response nor community assistance locations staffed.

**Response to Decision (D.) 19-05-042 Requirements**

**1. Decision criteria leading to de-energization.**

SCE meteorologists forecasted FPI and wind speed conditions to exceed PSPS criteria on Tuesday, September 24 with both gusty winds and low relative humidity. Wind gust speed was forecasted to reach up to 50 mph, and SCE's fire potential index for the Saddleback Circuits was forecasted to exceed thresholds. Once forecasted weather conditions appeared in the field via real-time weather station, SCE's PSPS IMT IC made the decision to de-energize the circuits. The Dysart Circuit was de-energized due to being downstream from the Saddleback Circuit.

**2. A copy of all notifications, the timing of notifications, the methods of notifications and who made the notifications (the utility or local public safety partners).**

A copy of all notifications, the timing of notifications and the methods of notifications can be found in Appendix B, "Public Safety Partner Notifications" and Appendix C, "Customer Notifications" of this report.

**3. An explanation of the circumstances that resulted in failure to communicate a potential pro-active de-energization event, if any.**

All appropriate communications were executed in accordance with PSPS protocols.

**4. A description and evaluation of engagement with local and state public safety partners in providing advanced education and outreach during the de-energization event.**

Advanced notification of this Public Safety Power Shutoff event was communicated to all impacted counties, CalOES and the CPUC approximately 72 hours before any forecasted weather was scheduled to impact the SCE service territory. Regular updates were given throughout the event using the CalOES PSPS Notification Form, daily situational awareness calls and individual contact with the impacted counties. Additional information regarding SCE's engagement with public safety partners is provided below in Appendix B, "Public Safety Partner Notifications."

**5. For those customers where positive or affirmative notification was attempted, an accounting of the customers (which tariff and/or access and functional needs population designation), the number of notification attempts made, the timing of attempts, who made the notification attempt (utility or public safety partner) and the number of customers for whom positive notification was achieved.**

SCE successfully contacted all customers with current and accurate contact information. All contact with critical care customers potentially impacted by this event was successful. Customer notification details are documented in Appendix C, "Customer Notifications."

**6. A description of how sectionalization, i.e., separating loads within a circuit, was considered and implemented and the extent to which it impacted the size and scope of the de-energization event.**

For Saddleback, the area of concern included the entire circuit span. For this reason, the circuits were not sectionalized, and the entire circuit was de-energized. Dysart was downstream from Saddleback, therefore sectionalization could not be implemented.

**7. An explanation of how the utility determined that the benefit of de-energization outweighed potential public safety risks**

SCE meteorologists forecasted Elevated Fire Weather threat for the Riverside County area, including the risk for rapid spread of wildfire and extreme fire behavior that would lead to a threat to life and property if an ignition occurred. Furthermore, precautionary statements were issued for extreme fire danger calling for extreme caution with potential fire ignition sources. SCE maintained close coordination with local fire authorities and emergency management personnel to identify any potential public safety risks associated with de-energization, and none were noted. Based on live weather data and field observations, SCE determined that the benefit of de-energization outweighed potential public safety risks associated with wildfire ignition.

**8. The timeline for power restoration (re-energization), in addition to the steps taken to restore power as required in Resolution ESRB-8**

The Saddleback and Dysart Circuits were de-energized at 2:46 p.m. on Tuesday, September 24. A re-energization strategy was developed, and post-patrol assets were forward deployed to support immediate patrol activities once weather conditions abated. All circuits were re-energized by 8:34 p.m.

**9. Lessons learned from the de-energization events**

SCE conducts after action reviews with internal and external stakeholders to determine any lessons learned from de-energization events. Lessons learned are documented in After Action Reports (AARs) and assigned to the responsible business unit for resolution. These AARs will be made available upon request.

The following lessons learned were captured during this incident:

- A Communications Tactics Meeting was established as part of the IMTs circuit review and messaging continuity process. This meeting will become a Standard

Operating Procedure moving forward and includes stakeholders from Local Public Affairs, Corporate Communications and Customer Service. The purpose of this meeting is to align messaging across all organizational units involved in customer communications and ensure consistent messaging to all customers.

**10. Any recommended updates to the guidelines adopted in Resolution ESRB-8 and Decision (D.) 19-05-042**

No updates to the guidelines have been identified from this event.

## **Appendix B**

# **Public Safety Partner Notifications**

### Sample LNO Messaging

#### Initial PSPS Messaging

**PLEASE REPLACE "TITLE" ABOVE WITH THE FOLLOWING PRIOR TO SENDING:** Subject Line:  
Important Information from SCE – Possible Public Safety Power Shutoff (PSPS) in [COUNTY NAME] on [DATE]

This message is from the Southern California Edison Liaison Officer for official use by local government officials.

Due to projected weather conditions, SCE is exploring options for a potential Public Safety Power Shutoff (PSPS) of electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and unincorporated areas in [COUNTY NAME] County as early as [DATE].

**Please note that while these areas may already be experiencing weather-related outages, SCE has not proactively shut off power at this time.**

**PSPS LNO -- remember to attach the filtered chart for this specific county to this notification before sending.**

***Please refer to the attached file for the notification status for circuits in your county.***

For your reference, PDF and GIS circuit maps may be found at [www.sce.com/maps](http://www.sce.com/maps). Please look at the left-hand navigation links for a drop-down menu for this specific PSPS event to view maps for the circuits listed above. You may also find all HFRA maps, by County, and a list of circuits by jurisdiction to assist your planning efforts.

SCE has activated an Incident Management Team (IMT) to monitor conditions. The actual onset of weather conditions and other circumstances beyond our control may impact coordination and notification efforts. As such, there is a possibility that a PSPS event could be called sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will attempt to notify you as conditions change.

SCE is also notifying customers on the impacted circuits to inform them about the potential shutoff to give them time to prepare.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, SCE crews are working safely and as quickly as possible to restore service.

Please Note: Weather forecasts on radio and television may provide differing information. SCE is relying on forecast data provided by in-house meteorologists.

If you have any questions, please call 855-683-9067 to leave a message and we will return your call shortly. This number is for government agencies only. The Incident Management Team (IMT) Liaison Officer can be reached by email at [SCELiaisonOfficer@sce.com](mailto:SCELiaisonOfficer@sce.com). The public should call 800-611-1911 or visit [www.sce.com](http://www.sce.com) if they have questions.

**Again, no Public Safety Power Shutoffs have been initiated by SCE at this time.**

Updated Conditions Messaging

**PLEASE REPLACE THE "TITLE" ABOVE WITH THE FOLLOWING PRIOR TO SENDING:** Subject Line: Important Information from SCE – Possible Public Safety Power Shutoff in [XX] hours in [COUNTY NAME].

This message is from the Southern California Edison Liaison Officer for official use by local government officials.

SCE is continuing to monitor weather conditions and continues exploring options for a potential Public Safety Power Shutoff (PSPS) of electrical circuits in High Fire Risk Areas (HFRA) for cities and unincorporated areas in [COUNTY NAME].

**Please note that while these areas may already be experiencing weather-related outages, SCE has not proactively shut off power at this time.**

**[LNO-note that you may use the UPDATE template to add and remove as well as confirm ongoing status on the PSPS Monitor list. You may also use the Update Status feature within Everbridge you you don't have to enter Update info from scratch. Ask Cathy how to use the feature if you are not familiar -- saves lots of time.]**

SCE has identified the following HFRA circuits in your County that **remain on the PSPS Monitor list:**

**[CIRCUIT name] Circuit**

- Cities
- Unincorporated areas including the communities of ..... [if any]

**[CIRCUIT name] Circuit**

- Cities
- Unincorporated areas including the communities of ..... [if any]

For your reference, PDF and GIS circuit maps may be found at [www.sce.com/maps](http://www.sce.com/maps). Please look at the left-hand navigation links for a drop-down menu for this specific PSPS event to view maps for the circuits listed above. You may also find all HFRA maps, by County, and a list of circuits by jurisdiction to assist your planning efforts.

SCE's Incident Management Team (IMT) continues to monitor conditions. The actual onset of weather conditions and other circumstances beyond our control may impact coordination and notification efforts. As such, there is a possibility that a PSPS event could be called sooner than anticipated, additional circuits could be added, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will attempt to notify you as conditions change.

SCE is also notifying customers on the impacted circuits to inform them about the potential shutoff.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, SCE crews are working safely and as quickly as possible to restore service.

Please Note: Weather forecasts on radio and television may provide differing information. SCE is relying on forecast data provided by in-house meteorologists.

If you have any questions, please call 855-683-9067 to leave a message and we will return your call shortly. This number is for government agencies only. The Incident Management Team (IMT) Liaison Officer can be reached by email at [SCELiaisonOfficer@sce.com](mailto:SCELiaisonOfficer@sce.com). The public should call 800-611-1911 or visit [www.sce.com](http://www.sce.com) if they have questions.

**Again, no Public Safety Power Shutoffs have been initiated by SCE at this time.**

Imminent Shut-Down Messaging

**PLEASE REPLACE "TITLE" ABOVE WITH THE FOLLOWING PRIOR TO SENDING:** Subject Line: Important Information from SCE – IMMEDIATE SHUTDOWN in [COUNTY NAME].

This message is from the Southern California Edison Liaison Officer for official use by our local governments.

Due to forecasted fire weather conditions, **SCE may proactively turn off power within the next 1 to 4 hours** for a Public Safety Power Shutoff (PSPS) in your area though it may occur earlier or later depending on actual weather conditions.

- **[CIRCUIT name] Circuit**
  - City of xxx
  - **Unincorporated communities including xxx**

For your reference, PDF and GIS circuit maps may be found at [www.sce.com/maps](http://www.sce.com/maps). Please look at the left-hand navigation links for a drop-down menu for this specific PSPS event to view maps for the circuits listed above. You may also find all High Risk Fire Area (HFRA) maps, by County, and a list of circuits by jurisdiction to assist your planning efforts.

SCE has an Incident Management Team (IMT) in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe. SCE will provide an update to your agency as conditions change. Please note the actual onset of weather conditions and other circumstances beyond our control may impact coordination and notification efforts.

Please Note: Weather forecasts on radio and television may provide differing information. SCE is relying on forecast data provided by in-house meteorologists.

If you have any questions, please call 855-683-9067 to leave a message and we will return your call shortly. This number is for government agencies only. The IMT Liaison Officer can be reached by email at [SCELiaisonOfficer@sce.com](mailto:SCELiaisonOfficer@sce.com). The public should call 800-611-1911 or visit [www.sce.com](http://www.sce.com) if they have any questions.

## De-Energization Messaging

**PLEASE REPLACE "TITLE" ABOVE WITH THE FOLLOWING PRIOR TO SENDING:** Subject Line:  
Important Information from SCE – Power shut off to the [COUNTY NAME] area at [xx] time due to weather conditions

This message is from the Southern California Edison Liaison Officer for official use by our local governments.

Due to weather conditions, SCE shut off power to circuits in the [COUNTY NAME] area at [xx] time. Impacted circuits and locations are:

### **[NAME] Circuit**

- **City Name**
- **Unincorporated communities including [list unincorporated community names, if any]**

SCE is notifying customers on the affected circuits listed above to inform them about the shutoff event.

The following circuit(s) has/have not been de-energized, but remain on SCE's PSPS watch list:

### **[NAME] Circuit**

- **City Name**
- **Unincorporated communities including [list unincorporated community names, if any]**

For your reference, PDF and GIS circuit maps may be found at [www.sce.com/maps](http://www.sce.com/maps). Please look at the left-hand navigation links for a drop-down menu for this specific PSPS event to view maps for the circuits listed above. You may also find all High Risk Fire Area (HFRA) maps, by County, and a list of circuits by jurisdiction to assist your planning efforts.

SCE has an Incident Management Team (IMT) in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe. SCE will provide an update to your agency as conditions change. Please note the actual onset of weather conditions and other circumstances beyond our control may impact coordination and notification efforts.

SCE understands the inconvenience of shutting off electric service. This Public Safety Power Shutoff (PSPS) action was taken due to safety concerns for customers and the public in the region. The company's first priority is to protect public safety and the integrity of the electric system serving customers.

At this time, SCE cannot provide an estimate of restoration time. Power will be restored as conditions improve, crews conduct inspections, and determine it is safe to re-energize lines.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, SCE crews are working safely and as quickly as possible to restore service.

Please Note: Weather forecasts on radio and television may provide differing information. SCE is relying on forecast data provided by in-house meteorologists.

If you have any questions, please call 855-683-9067 to leave a message and we will return your call shortly. This number is for government agencies only. The IMT Liaison Officer can be reached by email at [SCELiaisonOfficer@sce.com](mailto:SCELiaisonOfficer@sce.com). The public should call 800-611-1911 or visit [www.sce.com](http://www.sce.com) if they have any questions.

## Re-Energization Messaging

**PLEASE REPLACE THE "TITLE" ABOVE WITH THE FOLLOWING PRIOR TO SENDING:** Subject Line:  
Important SCE information – PSPS power Re-Energization in progress in [COUNTY NAME]

This message is from the Southern California Edison Liaison Officer for official use by local government officials.

On [DATE and TIME], SCE initiated a Public Safety Power Shutoff (PSPS) for a [portion] of the XXX and XXX circuit(s) in the xxxxx area in [COUNTY NAME] due to weather conditions in High Fire Risk Areas.

**[Remember to group and send messages by County and list each Circuit still in play, separated into those being re-energized and those remaining out - delete this reminder before sending!]**

SCE crews have inspected the lines and determined it was safe to **RE-ENERGIZE** the following circuit(s). SCE will notify customers that power has been turned back on.

### [NAME] Circuit

- **City Name**
- **Unincorporated communities including [list unincorporated community names, if any]**

The following circuit(s) remain **DE-ENERGIZED**.

### [NAME] Circuit

- **City Name**
- **Unincorporated communities including [list unincorporated community names, if any]**

The following circuit(s) **REMAIN** on SCE's PSPS watch list:

### [NAME] Circuit

- **City Name**
- **Unincorporated communities including [list unincorporated community names, if any]**

For your reference, PDF and GIS circuit maps may be found at [www.sce.com/maps](http://www.sce.com/maps). Please look at the left-hand navigation links for a drop-down menu for this specific PSPS event to view maps for the circuits listed above. You may also find all High Risk Fire Area (HFRA) maps, by County, and a list of circuits by jurisdiction to assist your planning efforts.

SCE's Incident Management Team (IMT) continues to monitor conditions and coordinate with government agencies. We will continue to update your agency as conditions change.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, SCE crews are working safely and as quickly as possible to restore service.

Please Note: Weather forecasts on radio and television may provide differing information. SCE is relying on forecast data provided by in-house meteorologists.

If you have any questions, please call 855-683-9067 to leave a message and we will return your call shortly. This number is for government agencies only. The IMT Liaison Officer can be reached by email [SCEliaisonOfficer@sce.com](mailto:SCEliaisonOfficer@sce.com). The public should call 800-611-1911 or visit [www.sce.com](http://www.sce.com) if they have questions.

Averted Messaging

**PLEASE REPLACE "TITLE" ABOVE WITH THE FOLLOWING PRIOR TO SENDING:** Subject Line: Important Information from SCE – Public Safety Power Shutoff (PSPS) AVERTED in [COUNTY NAME] County

This message is from the Southern California Edison Liaison Officer for official use by local government officials.

As you may be aware, Public Safety Power Shutoff (PSPS) was considered for circuit(s) in your county. Due to improved weather conditions, PSPS has been **AVERTED**.

*Please refer to the attached file for a list of circuit status.*

SCE has also begun notifying customers of the PSPS cancellation.

For your reference, PDF and GIS circuit maps may be found at [www.sce.com/maps](http://www.sce.com/maps). Please look at the left-hand navigation links for a drop-down menu for this specific PSPS event to view maps for the circuits listed above. You may also find all HFRA maps, by county, and a list of circuits, by jurisdiction, to assist your planning efforts.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, SCE crews are working safely and as quickly as possible to restore service.

Please note: Weather forecasts on radio and television may provide differing information. SCE is relying on forecast data provided by in-house meteorologists.

If you have any questions, please call 855-683-9067 to leave a message and we will return your call shortly. This number is for government agencies only. The Incident Management Team (IMT) Liaison Officer can be reached by email at [SCELiaisonOfficer@sce.com](mailto:SCELiaisonOfficer@sce.com). The public should call 800-611-1911 or visit [www.sce.com](http://www.sce.com) if they have questions.
