Safety and Enforcement Division  
California Public Utilities Commission  
505 Van Ness Avenue  
San Francisco, CA 94102

**Re: PSPS Post Event Report Regarding Pro-Active De-Energization Event  
September 9 to September 19, 2019**

Dear Director Palmer:

Southern California Edison (SCE) respectfully submits the attached report in compliance with PSPS Post Event Reporting requirements regarding its pro-active de-energization event that began September 9, 2019. This report has been verified by an Officer of SCE in accordance with Rule 1.11 of the Commission's Rules of Practice and Procedure.

Sincerely,

A handwritten signature in blue ink that reads "Laura Genao / by KB".

Laura Genao  
Managing Director  
SCE State Regulatory Affairs

**Southern California Edison  
Public Safety Power Shutoff Protocol (PSPS)  
Post-Event Reporting in Compliance with Resolution ESRB-8  
and Decision 19-05-042  
September 9 to September 19, 2019**

**Submitted to:  
California Public Utilities Commission  
Director of the Safety and Enforcement Division  
October 3, 2019**

## **Executive Summary**

On September 9, 2019, Southern California Edison (SCE) reported to its Emergency Operations Center to continue performing response operations associated with an ongoing weather event where forecasted high winds and low relative humidity levels were expected to create the potential for employment of SCE's Public Safety Power Shutoff protocol. During the event, potentially affected customers were identified in Inyo, Mono, Kern, Los Angeles, Riverside, San Bernardino and Tuolumne counties. The PSPS notifications team completed required notifications to potentially impacted customers, emergency management agencies (county and state), and elected officials in areas which could be impacted and/or were impacted, except for one instance where real-time weather conditions required SCE to make a quick decision to de-energize impacted circuits to protect public safety. The specifics of the notification exception are detailed in subsequent sections of this report. Pro-active de-energization was ultimately required for a portion of the Inyo and Mono County areas and affected approximately 14,500 customers.

SCE submits the following report to the California Public Utilities Commission's Director of the Safety and Enforcement Division pursuant to Resolution ESRB-8 and Decision (D.) 19-05-042. In separate sections of this report, SCE sets forth the reasons for its decision to notify customers of the potential for de-energization, including the day-by-day background for the event, and responds to the questions as required in post-event reporting.

### **SCE's Decision to Notify and De-Energize Customers**

SCE's decision to notify customers of a potential or actual utilization of the Public Safety Power Shutoff (PSPS) protocol was based on the following factors:

- The National Weather Service (NWS) had issued Red Flag Warnings for some counties that contain SCE circuits in high fire risk areas.
- Ongoing assessments from SCE's in-house meteorologists informed about local weather conditions by strategically deployed weather stations (e.g. wind speeds, humidity, and temperature).
- Output from the SCE Fire Potential Index (FPI), which is a tool used to estimate wildfire potential based on actual weather and fuel conditions.
- Input from SCE's fire scientist on fire potential including consideration of weather and fuels.
- Real-time information from highly trained personnel positioned in high fire risk areas identified as at risk for extreme fire weather conditions.
- Specific concerns from local and state fire authorities regarding the potential consequences of wildfires in select locations, where applicable.
- Expected impact of de-energizing circuits on essential services such as public safety agencies, water pumps, traffic controls, etc.
- Other operational considerations to minimize potential wildfire ignitions.

Actions taken to manage the response during this event included:

- Initiating operating restrictions on affected circuits in affected counties<sup>1</sup>;
- Initial or continued activation of an Incident Management Team for directing response operations associated with potential de-energization;
- Notifications to potentially affected customers, emergency management agencies (county and state), and elected officials;
- Patrolling of affected circuits before and after the event; and
- Live field observations of affected circuits during the Period of Concern<sup>2</sup> to help inform the need to execute the Public Safety Power Shutoff Protocol to maintain public safety.

Additional details of the event leading to the decision to provide notifications can also be found in the report timeline below.

---

<sup>1</sup> Specific operating restrictions SCE may employ during a Public Safety Power Shutoff can be found in the 2019 SCE Wildfire Mitigation Plan approved by the CPUC on May 30, 2019.

<sup>2</sup> Period of Concern is the time period circuits on the monitored circuit list are subject to potential use of the Public Safety Power Shutoff as determined by SCE. Live field observations may be performed during this timeframe.

### **Event Summary September 9, 2019 to September 19, 2019**

On Monday, September 9, SCE's Situational Awareness Center updated SCE's Business Resiliency Duty Manager and on-duty Incident Management personnel on the forecasts predicting local winds with high gusts, hot temperatures, and very dry conditions creating an Elevated Fire Weather Threat (EFWT). PSPS Incident Management Team 3 reported to the Emergency Operations Center (EOC) to continue overseeing execution of the PSPS protocol, which included but was not limited to, the three circuits that remained on the monitoring list from the September 4, 2019 PSPS event. PSPS IMTs were activated through the evening of September 19. Throughout the 10-day event, seven counties were in scope for de-energization, impacting approximately 14,500 customers. Appendix A contains the "Period of Concern" reports for each day of this event.

On Monday, September 9, the National Weather Service (NWS) issued a Red Flag Warning for gusty winds and low relative humidity throughout portions of Mono County beginning at 1:00 p.m. through 9:00 p.m., and portions of Inyo County from 5:00 p.m. through 5:00 a.m. Tuesday, September 10, 2019, with wind gusts forecasted to reach 50 mph and relative humidity levels expected to drop as low as 6-12 percent. The warning cited the potential for rapid growth in size and intensity if an ignition occurred. A Wind Advisory remained in place for portions of Santa Barbara County through 3:00 a.m. on Tuesday, September 10, 2019 with forecasted peak wind gusts of up to 50 mph.

On Tuesday September 10, the NWS issued a Wind Advisory for portions of Kern County through 5:00 a.m. on Wednesday, September 11, 2019 with peak wind gusts forecasted to reach 50 mph. On Wednesday, September 11, a Fire Weather Watch was issued for portions of Mono County beginning the afternoon of Sunday, September 15 through the afternoon of Monday, September 16, with wind gusts up to 50 mph and relative humidity levels as low as eight percent expected.

On Friday September 13, the NWS issued a Heat Advisory for portions of Los Angeles County beginning at 11:00 a.m. through 5:00 p.m. On Saturday, September 14, the NWS issued Red Flag Warnings for portions of Mono County beginning at 2:00 p.m. Sunday, September 15 through 6:00 p.m. Monday, September 16 with gusty winds and low relative humidity levels expected.

Throughout the day on Sunday, September 15, notifications were made to potentially impacted customers in Inyo, Kern, Los Angeles, Mono, Riverside and San Bernardino counties that they were in scope for a potential PSPS event. The PSPS IMT closely monitored both weather models and real-time weather observations, as well as received real-time information from live field observers. Based on those real-time interactions, the IC refined the event start time and decided to initiate de-energization protocol.

The Control-Plant3-Plant4 circuit in Inyo County was proactively de-energized as outlined below:

- The Control-Plant3-Plant4 circuit in the area of Bishop was proactively de-energized at 5:49 p.m. There were no customers impacted as only SCE facilities are fed by that circuit. After winds abated, appropriate re-energization protocols were applied, and power was restored at 2:11 p.m. on Tuesday, September 17.

On Monday, September 16, local winds with high gusts of 35-45 mph and elevated to moderate fire weather was forecasted for portions of Inyo and Mono counties. The PSPS IMT 4 reported to the EOC and continued closely monitoring both weather models and real-time weather observations and received real-time information from live field observers. Based on those real-time interactions, the IC decided to initiate de-energization protocol. Forty circuits in portions of Inyo and Mono counties were pro-actively de-energized at 1:03 p.m., with approximately 14,500 customers (mostly residential with nine critical care customers) affected in the areas outlined below:

- Inyo County
  - Communities of Aspendell, Round Valley near Silver Canyon, and Bishop.
- Mono County
  - Communities of Mammoth Lakes, Benton, Benton Hot Springs, Lake Mary, Owens Valley, Toms Place, Swall Meadow, Willow Springs, area from Rush Creek to Agnew Lake, area near Lee Vining, and area near Tuolumne Meadows.

Some communities in Inyo and Mono counties did not receive 24-hour notification that a proactive de-energization could be taking place. This was due to a coding error in the model which SCE uses to calculate the Fire Potential Index (FPI). The impact of this error was that FPI for circuits at higher elevations was not calculated. While the error was corrected it resulted in a delay in providing notice to customers. By the time the fuel (FPI) risk was identified, the winds were strengthening significantly, and SCE had to make a quick decision to de-energize impacted circuits to protect public safety. Customers in these communities received notification just under two hours prior to de-energization. At approximately 2:00 p.m., less than one hour after impacted circuits were pro-actively de-energized, an NWS weather station near the Conway Circuit in Mono County recorded wind gusts of 88 mph.

SCE deployed a Community Outreach Vehicle (COV) to Round Valley School in Bishop beginning the morning of Monday, September 16 through the evening hours. A second COV was dispatched to the area and made available the morning of Tuesday, September 17.

Based on improved conditions and updated forecasting, re-energization protocols were initiated, and the first customers were restored at 11:00 p.m. on Monday, September 16. Restoration efforts continued throughout the evening and by 4:00 a.m. on Tuesday, September 17, approximately 10,000 customers had their power restored. All pro-actively de-energized circuits in Inyo and Mono counties were fully restored by 4:19 p.m.

On Wednesday, September 18 the NWS issued a Red Flag Warning for portions of Inyo County beginning at 4:00 p.m. through 5:00 a.m. Thursday, September 19, with gusty winds up to 50 mph and relative humidity levels as low as 15 percent expected. PSPS IMT 4 closely monitored both weather models and real-time weather observations and received real-time information from live field observers throughout the day. Based on those real-time interactions, the IC refined the event start time and decided to initiate de-energization protocol.

The Robinson Creek and Rhinedollar Circuits in Mono County were proactively de-energized as outlined below:

- The Robinson Creek Circuit in the area of Bridgeport Valley to Twin Lakes was proactively de-energized at 11:36 a.m. A total of 257 customers, mostly residential, were affected with one critical care customer affected. After winds abated, re-energization protocols were applied and power was restored at 8:19 p.m. on Wednesday, September 18, 2019.
- The Rhinedollar Circuit in the area of Yosemite was proactively de-energized at 4:23 p.m. A total of 30 customers, mostly major, were affected with no critical care customers affected. After winds abated re-energization protocols were applied and power was restored at 7:36 p.m. on Wednesday, September 18, 2019.

Due to improved weather conditions and updated forecast analysis on Thursday, September 19, it was determined that no circuits were expected to meet PSPS criteria for at least the next three days, which satisfied SCE's internal protocols for de-mobilization. At 6:00 p.m., the decision was made to end the PSPS event, and de-mobilize the PSPS IMT. SCE provided updated notifications to emergency and public safety partners, critical infrastructure providers and potentially affected customers advising that they were no longer in scope for the PSPS event.

**Response to ESRB-8 Requirements**

The following material addresses Resolution ESRB-8 requirements in each of the categories associated with notifications. Each category is addressed in a separate section.

**1. The local communities’ representatives contacted prior to de-energization, the date on which they were contacted, and whether the areas affected by the de-energization are classified as Zone 1, Tier 2, or Tier 3 as per the definition in General Order 95, Rule 21.2-D**

SCE maintained ongoing communications with both unincorporated and incorporated communities affected throughout the duration of the weather event ending September 19, 2019, including the local community representatives. Appendix B, “Public Safety Partner Notifications,” includes the notifications that were sent to local community representatives during this event. The notifications were sent via SCE’s mass notification system to a comprehensive list of community contacts within each county. Additionally, PDF maps and electronic mapping files for affected areas were made accessible to all affected areas at [www.sce.com/maps](http://www.sce.com/maps). SCE also routinely submitted the CalOES Public Safety Power Shutoff Notification Form to the State Warning Center as conditions changed.

The areas affected by this event were classified as elevated Tier 2 and extreme Tier 3 fire-threat areas, as well as areas previously-included in CAL FIRE’s Fire Hazard Severity Zone maps.

The following table illustrates when initial contact was made as required, and additional information is in Appendix B of this report.

## Media Communications

SCE provided customers and the public with information on the potential PSPS via regular updates on [sce.com](http://sce.com) (specifically <https://www.sce.com/safety/wildfire/psps> ) and via SCE’s social media channels. Customers were given the current status in specific cities and communities that could be affected by a PSPS and were also given safety tips and guidelines.

SCE’s public information officers issued 18 messaging documents providing public updates during the activation. These updates, which SCE posted online and shared on social media channels, are used by all customer facing company representatives including customer service, media, social media, government, and agency representatives during the activation.

Please see chart below that includes PSPS related media inquiries and follow-up:

<b>Date</b>	<b>Outlet</b>	<b>Follow Up</b>
9/9/2019	Santa Barbara Independent (newspaper)	Provided approved messaging related to the PSPS activation and interview.
9/11/2019	Cal. Energy Markets (online publication)	Provided approved messaging related to the PSPS activation and interview.
9/16/2019	Associated Press Los Angeles (wire service)	Provided approved PSPS activation messaging.
9/17/2019	Natural Gas Intelligence/Shale Daily (online publication)	Provided approved messaging related to the PSPS activation and interview.
9/18/2019	Mammoth Times (newspaper)	Provided approved messaging related to the PSPS activation and interview.
9/18/2019	The Sheet - Mammoth CA (newspaper)	Provided approved messaging related to the PSPS activation and interview.
9/18/2019	Sierra Wave (newspaper)	Provided approved messaging related to the PSPS activation and interview.

## 2. If unable to provide customers with notice at least 2 hours prior to the de-energization event, provide an explanation in its report.

On Monday, September 16, some communities in Inyo and Mono counties did not receive 24-hour notification that a pro-active de-energization could be taking place. This was due to a coding error in the model which SCE uses to calculate the Fire Potential Index (FPI). The impact of this error was that FPI for circuits at higher elevations was not calculated. While the error was corrected it resulted in a delay in providing notice to customers. By the time

the fuel (FPI) risk was identified, the winds were strengthening significantly, and SCE had to make a quick decision to de-energize impacted circuits to protect public safety. Customers in these communities received notification just under two hours prior to de-energization. At approximately 2:00 p.m., less than one hour after impacted circuits were pro-actively de-energized, an NWS weather station near the Conway Circuit in Mono County recorded wind gusts of 88 mph.

Customers were notified at the time power was de-energized, and when power was restored.

**3. Summarize the number and nature of complaints received as the result of the de-energization event and include claims that are filed due to de-energization.**

As of October 1, SCE received a total of two complaints related to the PSPS event that took place September 9-19, 2019:

- Two complaints: Inconvenience of being without power
- No claims were filed due to de-energization during this event

**4. Provide a detailed description of the steps taken to restore power.**

Once the elevated fire conditions abated, SCE immediately initiated post-patrols, including the use of helicopters, to confirm the safety of the de-energized circuits. Once the patrols were completed and the circuits were deemed to be clear of any hazards, re-energization protocol was initiated. All circuits were re-energized by 8:19 p.m. on Wednesday, September 18, 2019.

**5. Identify the address of each community assistance location during a de-energization event, describe the location (in a building, a trailer, etc.), and describe the assistance available at each location, and give the days and hours that it was open.**

SCE deployed a Community Outreach Vehicle (COV) to Round Valley School in Bishop beginning the morning of Monday, September 16 through 9:00 p.m. A second COV was dispatched to the Vons Shopping Center at Minaret Village Mall in Mammoth Lakes at 8:00 a.m. Tuesday, September 17. The COV was equipped with-mobile charging capabilities so customers could charge personal mobile devices and continue to receive updates about the outage. The COV was also stocked with water and snacks to help mitigate the impact to customers. SCE subject matter experts were onsite throughout the duration of the event to provide information and answer questions. The COV was de-mobilized in the evening on Thursday, September 18.

## **Response to Decision (D.) 19-05-042 Requirements**

### **1. Decision criteria leading to de-energization.**

SCE meteorologists forecasted FPI and wind speed conditions to exceed PSPS criteria on Sunday, September 15 with both gusty winds and low relative humidity. Winds speeds were forecasted to reach up to 50 mph, and SCE's fire potential index for the Control-Plant3-Plant 4 Circuit was forecasted to exceed thresholds. The NWS issued both Fire Weather Watches and a Red Flag warning. Once forecasted weather conditions appeared in the field via real-time weather station and live field observation, SCE's PSPS IMT IC decided to de-energize the circuit.

On Monday, September 16, SCE meteorologists forecasted FPI and wind speed conditions to exceed PSPS criteria on 40 circuits in Inyo and Mono counties with both gusty winds and low relative humidity. Once forecasted weather conditions appeared in the field via real-time weather station and live field observation, SCE's PSPS IMT IC made the decision to de-energize the circuits. At approximately 2:00 p.m., less than one hour after impacted circuits were pro-actively de-energized, an NWS weather station just south of the Conway Circuit in Mono County recorded wind gusts of 88 mph.

On Wednesday, September 18, SCE meteorologists forecasted FPI and wind speed conditions to exceed PSPS criteria on the Robinson Creek and Rhinedollar Circuits in Inyo County with both gusty winds and low relative humidity levels. SCE weather stations in the area showed continued increase in wind speeds, rapidly approaching the thresholds, and live field observers reported wind speeds of 45-50 mph with movement in overhead lines. Based on this, SCE's PSPS IMT IC made the decision to de-energize the circuits.

### **2. A copy of all notifications, the timing of notifications, the methods of notifications and who made the notifications (the utility or local public safety partners).**

A copy of all notifications, the timing of notifications and the methods of notifications can be found in Appendix B "Public Official Notifications"; Appendix C, "Customer Notifications"; and Table 1 of this report. SCE was the primary provider of customer notifications. The respective counties shared the primary messaging executed by SCE with public safety partners for situational awareness.

### **3. An explanation of the circumstances that resulted in failure to communicate a potential pro-active de-energization event, if any.**

On Monday, September 16, some communities in Inyo and Mono counties did not receive 24-hour notification that a pro-active de-energization could be taking place. This was due to a coding error in the model which SCE uses to calculate the Fire Potential Index (FPI). The impact of this error was that FPI for circuits at higher elevations was not calculated. While

the error was corrected it resulted in a delay in providing notice to customers. By the time the fuel (FPI) risk was identified, the winds were strengthening significantly, and SCE had to make a quick decision to de-energize impacted circuits to protect public safety. Customers in these communities received notification just under two hours prior to de-energization. At approximately 2:00 p.m., less than one hour after impacted circuits were pro-actively de-energized, an NWS weather station near the Conway Circuit in Mono County recorded wind gusts of 88 mph.

Customers were notified at the time power was de-energized, and when power was restored.

**4. A description and evaluation of engagement with local and state public safety partners in providing advanced education and outreach during the de-energization event.**

Advanced notification of this Public Safety Power Shutoff event was communicated to all affected counties, CalOES and the CPUC approximately 72 hours before any forecasted weather was scheduled to impact the SCE service territory. Regular updates were given throughout the event using the CalOES PSPS Notification Form, daily situational awareness calls and individual contact with the affected counties. Additional information regarding SCE's engagement with public safety partners is provided above in the Event Timeline and Responses to ESRB-8 Requirements.

**5. For those customers where positive or affirmative notification was attempted, an accounting of the customers (which tariff and/or access and functional needs population designation), the number of notification attempts made, the timing of attempts, who made the notification attempt (utility or public safety partner) and the number of customers for whom positive notification was achieved.**

SCE successfully contacted all customers with current and accurate contact information. All contact with critical care customers potentially impacted by this event were successful.

**6. A description of how sectionalization, i.e., separating loads within a circuit, was considered and implemented and the extent to which it impacted the size and scope of the de-energization event.**

All circuits were in HFRA's and were forecasted to meet or exceed established thresholds. Sectionalization was considered for all circuits that met the criteria for pro-active de-energization. The areas of concern included the entire circuit span, and all were expected to meet the established PSPS criteria; therefore, the entire circuit was de-energized in all but one instance. Sectionalization was implemented on the Birchim Circuit at the request of the fire department, as a portion of the circuit fed the base camp of an active firefighting operation.

**7. An explanation of how the utility determined that the benefit of de-energization outweighed potential public safety risks**

Both SCE meteorologists and NWS forecasted extreme fire weather conditions for the Inyo and Mono County areas, including the risk for rapid spread of wildfire and extreme fire behavior that would lead to a threat to life and property if an ignition occurred. Furthermore, precautionary statements were issued for extreme fire danger calling for extreme caution with potential fire ignition sources. SCE maintained close coordination with local fire authorities and emergency management personnel to identify any potential public safety risks associated with de-energization, and none were noted. Based on the extreme fire risk, SCE determined that the benefit of de-energization outweighed potential public safety risks associated with pro-active de-energization.

**8. The timeline for power restoration (re-energization), in addition to the steps taken to restore power as required in Resolution ESRB-8**

As mentioned above, one circuit (Control-Plant3-Plant4) was de-energized at 5:49 p.m. on Sunday, September 15. A re-energization strategy was developed, and post-patrol assets were forward deployed to support immediate patrol activities once weather conditions abated. The Control-Plant3-Plant4 Circuit was re-energized by 2:11 p.m. on Tuesday, September 17.

On Monday, September 16, forty circuits in portions of Inyo and Mono counties were pro-actively de-energized at 1:03 p.m. A re-energization strategy was developed, and post-patrol assets were forward deployed to support immediate patrol activities once weather conditions abated. The first of the circuits were restored at 11:00 p.m. on Monday, September 16. A second group of circuits were restored by 4:00 a.m. on Tuesday, September 17, and all circuits were fully restored by 4:19 p.m. on Tuesday, September 17.

The Robinson Creek Circuit in Inyo County was pro-actively de-energized at 11:36 a.m. on Wednesday, September 18. A re-energization strategy was developed, and post-patrol assets were forward deployed to support immediate patrol activities once weather conditions abated. The Robinson Creek Circuit was re-energized at 8:19 p.m. the same day.

The Rhinedollar Circuit in Inyo County was pro-actively de-energized at 4:23 p.m. on Wednesday, September 18. A re-energization strategy was developed, and post-patrol assets were forward deployed to support immediate patrol activities once weather conditions abated. The Rhinedollar Circuit was re-energized at 7:36 p.m. the same day.

**9. Lessons learned from the de-energization events**

SCE will be conducting after action reviews with internal and external stakeholders to determine any lessons learned from this de-energization event. Lessons learned will be documented and assigned to the responsible business unit for resolution.

**10. Any recommended updates to the guidelines adopted in Resolution ESRB-8 and Decision (D.) 19-05-042**

No updates to the guidelines have been identified from this event.

**Subject:** Important Information from SCE – Possible Public Safety Power Shutoff (PSPS) in Riverside County

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local government officials.

As you are aware, Public Safety Power Shutoff (PSPS) was considered for your area. However, due to improved weather conditions, the following circuit and corresponding communities are **no longer** being considered for PSPS:

**POPPY FLATS** circuit

Unincorporated Riverside County, including the communities of Cabazon, Mons, and Banning Pass

SCE will also notify customers on the circuit listed above of the PSPS cancellation.

For your reference, PDF and GIS circuit maps may be found at [www.sce.com/maps](http://www.sce.com/maps). Please look at the left-hand navigation links for a drop-down menu for this specific PSPS event to view maps for the circuits listed above. You may also find all High Risk Fire Area (HFRA) maps, by County, and a list of circuits by jurisdiction to assist your planning efforts.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, SCE crews are working safely and as quickly as possible to restore service.

Please Note: Weather forecasts on radio and television may provide differing information. SCE is relying on forecast data provided by in-house meteorologists.

If you have any questions, please call 855-683-9067 to leave a message and we will return your call shortly. This number is for government agencies only. The IMT Liaison Office

**Subject:** UPDATE: Important Information from SCE – Update on Possible Public Safety Power Shutoff in Riverside County

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local government officials.

SCE is continuing to monitor weather conditions and continues exploring options for a potential Public Safety Power Shutoff (PSPS) of electrical circuits in High Fire Risk Areas (HFRA) for cities and unincorporated areas in Riverside County.

Please note that while these areas may already be experiencing weather-related outages, SCE has not proactively shut off power at this time.

The following HFRA circuits in your County remain on the PSPS monitor list and might be de-energized:

**COACHELLA and SKYBORNE** circuits  
Portion of the City of Desert Hot Springs  
Unincorporated community of North Palm Springs

**TOLL** circuit  
Unincorporated Riverside County, including communities of Whitewater and Bonnie Bell

**WINDFARM, BOTTLE and DEVERS-BANNING-WINDPARK**  
Unincorporated Riverside County, including communities of Cabazon, Mons, and Banning Pass

For your reference, PDF and GIS circuit maps may be found at [www.sce.com/maps](http://www.sce.com/maps). Please look at the left-hand navigation links for a drop-down menu for this specific PSPS event to view maps for the circuits listed above. You may also find all HFRA maps, by County, and a list of circuits by jurisdiction to assist your planning efforts.

SCE's Incident Management Team (IMT) continues to monitor conditions. The actual onset of weather conditions and other circumstances beyond our control may impact coordination and notification efforts. As such, there is a possibility that a PSPS event could be called sooner than anticipated, additional circuits could be added, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will attempt to notify you as conditions change.

SCE is also notifying customers on the impacted circuits to inform them about the potential shutoff.

**Subject:** Important Information from SCE – Possible Public Safety Power Shutoff (PSPS) in Los Angeles County

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local government officials.

Due to projected weather conditions, SCE is exploring options for a potential Public Safety Power Shutoff (PSPS) of electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and unincorporated areas in Los Angeles County.

**Please note that while these areas may already be experiencing weather-related outages, SCE has not proactively shut off power at this time.**

The following circuits and corresponding communities in your County are currently on SCE's PSPS watch list:

**Shovel Circuit**

**Unincorporated Los Angeles County, Acton, and Boiling Point**

For your reference, PDF and GIS circuit maps may be found at [www.sce.com/maps](http://www.sce.com/maps). Please look at the left-hand navigation links for a drop-down menu for this specific PSPS event to view maps for the circuits listed above. You may also find all HFRA maps, by County, and a list of circuits by jurisdiction to assist your planning efforts.

SCE has activated an Incident Management Team (IMT) to monitor conditions. The actual onset of weather conditions and other circumstances beyond our control may impact coordination and notification efforts. As such, there is a possibility that a PSPS event could be called sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will attempt to notify you as conditions change.

SCE is also notifying customers on the impacted circuits to inform them about the potential shutoff to give them time to prepare.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, SCE crews are working safely and as quickly as possible to restore service.

As such, there is a possibility that a PSPS event could be called sooner than anticipated, additional circuits could be added, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will attempt to notify you as conditions change.

SCE is also notifying customers on the impacted circuits to inform them about the potential shutoff.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, SCE crews are working safely and as quickly as possible to restore service.

---

Please Note: Weather forecasts on radio and television may provide differing information. SCE is relying on forecast data provided by in-house meteorologists.

If you have any questions, please call 855-683-9067 to leave a message and we will return your call shortly. This number is for government agencies only. The Incident Management Team (IMT) Liaison Officer can be reached by email at [SCELiaisonOfficer@sce.com](mailto:SCELiaisonOfficer@sce.com). The public should call 800-611-1911 or visit [www.sce.com](http://www.sce.com) if they have questions.

Again, no Public Safety Power Shutoffs have been initiated by SCE at this time.

**Subject:** UPDATE: Important Information from SCE on Possible Public Safety Power Shutoff in Inyo County

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local government officials.

SCE is continuing to monitor weather conditions and continues exploring options for a potential Public Safety Power Shutoff (PSPS) of electrical circuits in High Fire Risk Areas (HFRA) for cities and unincorporated areas in Inyo County.

Please note that while these areas may already be experiencing weather-related outages, SCE has not proactively shut off power at this time.

SCE has identified the following HFRA circuit and corresponding communities in your County which remain on the SCE PSPS monitor list and might be de-energized.

**BIRCHIM** circuit

- Unincorporated Inyo County, including the community of Round Valley

For your reference, PDF and GIS circuit maps may be found at [www.sce.com/maps](http://www.sce.com/maps). Please look at the left-hand navigation links for a drop-down menu for this specific PSPS event to view maps for the circuits listed above. You may also find all HFRA maps, by County, and a list of circuits by jurisdiction to assist your planning efforts.

SCE's Incident Management Team (IMT) continues to monitor conditions. The actual onset of weather conditions and other circumstances beyond our control may impact coordination and notification efforts. As such, there is a possibility that a PSPS event could be called sooner than anticipated, additional circuits could be added, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will attempt to notify you as conditions change.

SCE is also notifying customers on the impacted circuits to inform them about the potential shutoff.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, SCE crews are working safely and as quickly as possible to restore service.

**Subject:** Important Information from SCE – Possible Public Safety Power Shutoff (PSPS) in San Bernardino County on Sunday, September 17 (72-hour notice)

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local government officials.

Due to projected weather conditions, SCE is exploring options for a potential Public Safety Power Shutoff (PSPS) of electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and unincorporated areas in San Bernardino County within the next 72 hours.

Please note that while these areas may already be experiencing weather-related outages, SCE has not proactively shut off power at this time.

The following circuits and corresponding communities in your County are currently on SCE's PSPS watch list:

**TWIN PEAKS circuit**

- Unincorporated San Bernardino County, including the communities of Lake Arrowhead and Crestline

For your reference, PDF and GIS circuit maps may be found at [www.sce.com/maps](http://www.sce.com/maps). Please look at the left-hand navigation links for a drop-down menu for this specific PSPS event to view maps for the circuits listed above. You may also find all HFRA maps, by County, and a list of circuits by jurisdiction to assist your planning efforts.

SCE has activated an Incident Management Team (IMT) to monitor conditions. The actual onset of weather conditions and other circumstances beyond our control may impact coordination and notification efforts. As such, there is a possibility that a PSPS event could be called sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will attempt to notify you as conditions change.

Please note that customers have not yet been notified. Customer notices are released two days prior in order to give them time to prepare.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, SCE crews are working safely and as quickly as possible to restore service.

1

---

Please Note: Weather forecasts on radio and television may provide differing information. SCE is relying on forecast data provided by in-house meteorologists.

If you have any questions, please call 855-683-9067 to leave a message and we will return your call shortly. This number is for government agencies only. The Incident Management Team (IMT) Liaison Officer can be reached by email at [SCELiaisonOfficer@sce.com](mailto:SCELiaisonOfficer@sce.com). The public should call 800-611-1911 or visit [www.sce.com](http://www.sce.com) if they have questions.

Again, no Public Safety Power Shutoffs have been initiated by SCE at this time.

**Subject:** Important Information from SCE – Possible Public Safety Power Shutoff (PSPS) in Los Angeles County

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local government officials.

Due to projected weather conditions, SCE is exploring options for a potential Public Safety Power Shutoff (PSPS) of electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and unincorporated areas in Los Angeles County as early as today, September 16.

**Please note that while these areas may already be experiencing weather-related outages, SCE has not proactively shut off power at this time.**

**The following circuits and corresponding communities in your County are currently on SCE's PSPS watch list:**

**Whip Circuit:**

- City of Lancaster
- Unincorporated communities including Quartz Hill

**The following circuits and corresponding communities in your County continue on SCE's PSPS Monitor list:**

**Bootlegger Circuit**

- Unincorporated Los Angeles County including the community of Acton

**Shovel Circuit**

- Unincorporated Los Angeles County including the communities of Acton, Agua Dulce and Boiling Point

**Titan Circuit**

- City of Palmdale
- Unincorporated Los Angeles County, including the communities of Juniper Hills, Littlerock, Llano, Pearblossom, and Valyermo

**Huckleberry Circuit**

- **Unincorporated Los Angeles County, including the communities of Leona Valley and Lincoln Crest**

However, due to improved weather conditions, the following circuits and corresponding city/communities are no longer being considered for PSPS:

**Hughes Lake Circuit (including downstream Green Valley Circuit)**

- **Unincorporated Los Angeles County including the community of Lake Hughes and Leona Valley**

**Pronghorn Circuit**

- **City of Lancaster**
- **Unincorporated Los Angeles County including Elizabeth Lake**

For your reference, PDF and GIS circuit maps may be found at [www.sce.com/maps](http://www.sce.com/maps). Please look at the left-hand navigation links for a drop-down menu for this specific PSPS event to view maps for the circuits listed above. SCE will provide an update to your agency as conditions change. Please note the actual onset of weather conditions and other circumstances beyond our control may impact coordination and notification efforts.

SCE understands the inconvenience of shutting off electric service. This Public Safety Power Shutoff (PSPS) action was taken due to safety concerns for customers and the public in the region. The company's first priority is to protect public safety and the integrity of the electric system serving customers.

At this time, SCE cannot provide an estimate of restoration time. Power will be restored as conditions improve, crews conduct inspections, and determine it is safe to re-energize lines.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, SCE crews are working safely and as quickly as possible to restore service.

Please Note: Weather forecasts on radio and television may provide differing information. SCE is relying on forecast data provided by in-house meteorologists.

**Subject:** Important Information from SCE – Possible Public Safety Power Shutoff (PSPS) Update in Riverside County

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local government officials.

Due to projected weather conditions, SCE is exploring options for a potential Public Safety Power Shutoff (PSPS) of electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and unincorporated areas in Riverside County.

Please note that while these areas may already be experiencing weather-related outages, SCE has not proactively shut off power at this time in Riverside County.

The following circuits and corresponding communities in your County **continue** on SCE's PSPS Monitor list:

- **COACHELLA circuit (including downstream SKYBORNE circuit)**
  - Unincorporated Riverside County, including the community of North Palm Springs
- **TOLL circuit**
  - Unincorporated Riverside County, including the communities of Whitewater and Bonnie Bell

The following **new circuit has been added** to SCE's PSPS Monitor list for potential PSPS beginning Thursday, September 19:

- **PURCHASE circuit**
  - Unincorporated communities of Owl, Cabazon and portions of the Desert Hills Outlet Mall

However, due to improved weather conditions, the following circuit and corresponding communities **are no longer being considered** for PSPS:

- **POPPET Flats circuit**
  - Unincorporated Riverside County, including the communities of Cabazon, Mons, and Banning Pass

For your reference, PDF and GIS circuit maps may be found at [www.sce.com/maps](http://www.sce.com/maps). Please look at the left-hand navigation links for a drop-down menu for this specific PSPS event to view maps for the circuits listed above. You may also find all HFRA maps, by County, and a list of circuits by jurisdiction to assist your planning efforts.

SCE has activated an Incident Management Team (IMT) to monitor conditions. The actual onset of weather conditions and other circumstances beyond our control may impact coordination and notification efforts. As such, there is a possibility that a PSPS event could be called sooner than anticipated, additional circuits could

be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will attempt to notify you as conditions change.

Please note that customers have not yet been notified. Customer notices are released two days prior to give them time to prepare.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, SCE crews are working safely and as quickly as possible to restore service.

Please Note: Weather forecasts on radio and television may provide differing information. SCE is relying on forecast data provided by in-house meteorologists.

If you have any questions, please call 855-683-9067 to leave a message and we will return your call shortly. This number is for government agencies only. The Incident Management Team (IMT) Liaison Officer can be reached by email at [SCELiaisonOfficer@sce.com](mailto:SCELiaisonOfficer@sce.com). The public should call 800-611-1911 or visit [www.sce.com](http://www.sce.com) if they have questions.

Again, no Public Safety Power Shutoffs have been initiated by SCE at this time in Riverside County.

This message is from the Southern California Edison Liaison Officer for official use by local government officials.

SCE is continuing to monitor weather conditions and continues exploring options for a potential Public Safety Power Shutoff (PSPS) of electrical circuits in High Fire Risk Areas (HFRA) for cities and unincorporated areas in San Bernardino County.

**Please note that while these areas may already be experiencing weather-related outages, SCE has not proactively shut off power at this time.**

The following circuits and corresponding communities in your County **REMAIN** on SCE's PSPS Monitor list:

- **CAMPANULA circuit**
  - Yucca Valley, Unincorporated communities including Joshua Tree and Pioneer Town
- **COACHELLA circuit (including downstream SKYBORNE circuit)**
  - Unincorporated San Bernardino County
- **BLUE CUT circuit**
  - Unincorporated San Bernardino County including the community of Phelan
- **DOBLE circuit (including downstream SCOUT circuit)**
  - Unincorporated San Bernardino County including the Lucerne Valley area
- **PENSTOCK circuit**
  - City of Hesperia
  - Unincorporated San Bernardino County including Summit Terrace
- **SKY HI circuit**
  - Unincorporated area in Lucerne Valley
- **TETLEY circuit (including downstream CEDAR PINES and JOB circuits)**
  - Unincorporated San Bernardino County including the communities of Cedarpines Park, Valley of Enchantment, and Crestline
- **TWIN PEAKS circuit**
  - Unincorporated San Bernardino County including the communities of Cedar Pines Park, Crestline, and Twin Peaks

However, due to improved weather conditions, the following circuit and corresponding communities in your County are **NO LONGER BEING CONSIDERED** for PSPS:

- **VERDEMONT circuit**
  - City of Rialto
  - City of San Bernardino
  - Unincorporated San Bernardino County Muscoy to Cajon Junction

For your reference, PDF and GIS circuit maps may be found at [www.sce.com/maps](http://www.sce.com/maps). Please look at the left-hand navigation links for a drop-down menu for this specific PSPS event to view maps for the circuits listed above. You may also find all HFRA maps, by County, and a list of circuits by jurisdiction to assist your planning efforts.

SCE's Incident Management Team (IMT) continues to monitor conditions. The actual onset of weather conditions and other circumstances beyond our control may impact coordination and notification efforts. As such, there is a possibility that a PSPS event could be called sooner than anticipated, additional circuits could be added, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will attempt to notify you as conditions change.

SCE is also notifying customers on the impacted circuits to inform them about the potential shutoff.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, SCE crews are working safely and as quickly as possible to restore service.

Please Note: Weather forecasts on radio and television may provide differing information. SCE is relying on forecast data provided by in-house meteorologists.

If you have any questions, please call 855-683-9067 to leave a message and we will return your call shortly. This number is for government agencies only. The Incident Management Team (IMT) Liaison Officer can be reached by email at [SCELiaisonOfficer@sce.com](mailto:SCELiaisonOfficer@sce.com). The public should call 800-611-1911 or visit [www.sce.com](http://www.sce.com) if they have questions.

**Again, no Public Safety Power Shutoffs have been initiated by SCE at this time.**

**Jeffrey 1 Lee**

**Subject:** Important SCE information – PSPS power Re-Energization in progress in Mono County

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local government officials.

On September 16, SCE initiated a Public Safety Power Shutoff (PSPS) for circuits in Mono County due to weather conditions in High Fire Risk Areas.

SCE crews have inspected the lines and determined it was safe to **RE-ENERGIZE** the following circuits. SCE will notify customers that power has been turned back on.

- **CHATEAU Circuit**
  - Mammoth Lakes
- **NORDIC Circuit**
  - Mammoth Lakes

The following circuits remain **DE-ENERGIZED**.

AGNEW Circuit

- Unincorporated Mono County from Rush Creek to Agnew Lake
- AUTUMN Circuit
  - Mammoth Lakes and unincorporated community including Lake Mary
- BANTA Circuit
  - Unincorporated Mono County near Lee Vining
- BIRCHIM Circuit
  - Unincorporated Mono County including the community of Round Valley

- BOBSLED Circuit
  - Mammoth Lakes
- CAIN RANCH Circuit
  - South of Lee Vining
- CONWAY Circuit
  - Unincorporated Mono County
- CRAWFORD Circuit
  - Mammoth Lakes
- CROWLEY Circuit
  - Unincorporated Mono County including Mammoth Lakes
- DYNAMO Circuit
  - Unincorporated Mono County including the Community of Willow Springs
- FALLS Circuit
  - Mammoth Lakes
- GULL LAKE Circuit
  - Unincorporated Mono County
- HURLEY Circuit
  - Unincorporated Mono County and Mammoth Lakes
- McGEE Circuit
  - Unincorporated Mono County and Mammoth Lakes
- PICKLE MEADOWS Circuit
  - Unincorporated Mono County
- REVERSE PEAK Circuit
  - Unincorporated Mono County including Mammoth Lakes
- RHINEDOLLAR Circuit

- Unincorporated Mono County near Tuolumne Meadows
- ROBINSON CREEK Circuit
  - Unincorporated Mono County
- ROCKCREEK Circuit
  - Unincorporated Mono County including the communities of Toms Place and Swall Meadow
- SAGEHEN
  - Unincorporated Mono County including the communities of Benton, Benton Hot Springs and Owens Valley
- SITZMARK Circuit
  - Unincorporated Mono County including Mammoth Lakes
- SLALOM Circuit
  - Mammoth Lakes
- SLOPE Circuit
  - Mammoth Lakes
- SNOWDRIFT Circuit
  - Mammoth Lakes
- STROSNIDER Circuit
  - Unincorporated Mono County
- TUFA Circuit
  - Unincorporated Mono County
- VALENTINE Circuit
  - Mammoth Lakes

For your reference, PDF and GIS circuit maps may be found at [www.sce.com/maps](http://www.sce.com/maps). Please look at the left-hand navigation links for a drop-down menu for this specific PSPS event to view maps for the circuits listed above. You may also find all High Risk Fire Area (HFRA) maps, by County, and a list of circuits by jurisdiction to assist your planning efforts.

SCE's Incident Management Team (IMT) continues to monitor conditions and coordinate with government agencies. We will continue to update your agency as conditions change.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, SCE crews are working safely and as quickly as possible to restore service.

Please Note: Weather forecasts on radio and television may provide differing information. SCE is relying on forecast data provided by in-house meteorologists.

**Subject:** Important Information from SCE – Possible Public Safety Power Shutoff (PSPS) Update in Los Angeles County

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local government officials.

SCE is continuing to monitor weather conditions and continues exploring options for a potential Public Safety Power Shutoff (PSPS) of electrical circuits in High Fire Risk Areas (HFRA) for cities and unincorporated areas in Los Angeles County.

**Please note that while these areas may already be experiencing weather-related outages, SCE has not proactively shut off power at this time in your County.**

The following circuits and corresponding communities in your County **remain** on SCE's PSPS watch list:

**Bootlegger Circuit**

- Unincorporated Los Angeles County including the community of Acton

**Huckleberry Circuit**

- Unincorporated Los Angeles County, including the communities of Leona Valley and Lincoln Crest

**Shovel Circuit**

- Unincorporated Los Angeles County including the communities of Acton, Agua Dulce and Boiling Point

**Titan Circuit**

- City of Palmdale
- Unincorporated Los Angeles County, including the communities of Juniper Hills, Littlerock, Llano, Pearblossom, and Valyermo

**Whip Circuit:**

- City of Lancaster
- Unincorporated communities including Quartz Hill

For your reference, PDF and GIS circuit maps may be found at [www.sce.com/maps](http://www.sce.com/maps). Please look at the left-hand navigation links for a drop-down menu for this specific PSPS event to view maps for the circuits listed above. You may also find all HFRA maps, by County, and a list of circuits by jurisdiction to assist your planning efforts.

SCE's Incident Management Team (IMT) continues to monitor conditions. The actual onset of weather conditions and other circumstances beyond our control may impact coordination and notification efforts. As such, there is a possibility that a PSPS event could be called sooner than anticipated, additional circuits could be added, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will attempt to notify you as conditions change.

SCE is also notifying customers on the impacted circuits to inform them about the potential shutoff.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, SCE crews are working safely and as quickly as possible to restore service.

Please Note: Weather forecasts on radio and television may provide differing information. SCE is relying on forecast data provided by in-house meteorologists.

If you have any questions, please call 855-683-9067 to leave a message and we will return your call shortly. This number is for government agencies only. Subject: Important Information from SCE – Public Safety Power Shutoff (PSPS) Update in San Bernardino County

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local government officials.

SCE is continuing to monitor weather conditions and continues exploring options for a potential Public Safety Power Shutoff (PSPS) of electrical circuits in High Fire Risk Areas (HFRA) for cities and unincorporated areas in San Bernardino County.

**Please note that while these areas may already be experiencing weather-related outages, SCE has not proactively shut off power in your County at this time.**

SCE has identified the following HFRA circuit in your County that **are on the PSPS monitor list**:

**GUNSITE circuit**

- Near Big Oaks Canyon and Snow Peak

The following circuits **remain** on SCE's PSPS watch list for possible PSPS:

**COACHELLA circuit**

- Unincorporated San Bernardino County

**SKY HI circuit**

- Unincorporated area in Lucerne Valley

**TETLEY circuit (including downstream CEDAR PINES and JOB circuits)**

- Unincorporated San Bernardino County including the communities of Cedarpines Park, Valley of Enchantment, and Crestline

**TWIN PEAKS circuit**

- Unincorporated San Bernardino County including the communities of Cedar Pines Park, Crestline, and Twin Peaks

However, due to improved weather conditions, the following circuits and corresponding city/community name(s) are **no longer** being considered for PSPS:

**BLUE CUT circuit**

- Unincorporated San Bernardino County including the community of Phelan

**CAMPANULA circuit**

- Yucca Valley, Unincorporated communities including Joshua Tree and Pioneer Town

**DOBLE circuit (including downstream SCOUT circuit)**

- Unincorporated San Bernardino County including the Lucerne Valley area

**PENSTOCK circuit**

- City of Hesperia
- Unincorporated San Bernardino County including Summit Terrace

SCE will also notify customers on the circuits listed above of the PSPS cancellation.

SCE currently has an activated Incident Management Team (IMT) that is continuing to monitor conditions. We will notify you if conditions change.

For your reference, PDF and GIS circuit maps may be found at [www.sce.com/maps](http://www.sce.com/maps). Please look at the left-hand navigation links for a drop-down menu for this specific PSPS event to view maps for the circuits listed above. You may also find all High Risk Fire Area (HFRA) maps, by County, and a list of circuits by jurisdiction to assist your planning efforts.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, SCE crews are working safely and as quickly as possible to restore service.

Please Note: Weather forecasts on radio and television may provide differing information. SCE is relying on forecast data provided by in-house meteorologists.

If you have any questions, please call 855-683-9067 to leave a message and we will return your call shortly. This number is for government agencies only. The IMT Liaison Officer can be reached by email [SCELiaisonOfficer@sce.com](mailto:SCELiaisonOfficer@sce.com). The public may call 800-611-1911 or visit [www.sce.com](http://www.sce.com) if they have questions.

**Again, no Public Safety Power Shutoffs have been initiated by SCE in San Bernardino County at this time.**

Subject: Important SCE information – PSPS UPDATE in Inyo County

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local government officials.

On September 16, SCE initiated a Public Safety Power Shutoff (PSPS) for circuits in Inyo County due to weather conditions in High Fire Risk Areas.

SCE crews have inspected the lines and **RE-ENERGIZED** the following two circuits. SCE will notify customers that power has been turned back on. **NOTE, the two circuits are on the PSPS Monitor list:**

- **BIRCHIM Circuit**
  - Area of west Bishop and unincorporated Inyo County including the community Round Valley
- **SABRINA Circuit**
  - Unincorporated Inyo County including the community of Aspendell

For your reference, PDF and GIS circuit maps may be found at [www.sce.com/maps](http://www.sce.com/maps). Please look at the left-hand navigation links for a drop-down menu for this specific PSPS event to view maps for the circuits listed above. You may also find all High Risk Fire Area (HFRA) maps, by County, and a list of circuits by jurisdiction to assist your planning efforts.

SCE's Incident Management Team (IMT) continues to monitor conditions and coordinate with government agencies. We will continue to update your agency as conditions change.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, SCE crews are working safely and as quickly as possible to restore service.

Please Note: Weather forecasts on radio and television may provide differing information. SCE is relying on forecast data provided by in-house meteorologists.

Subject: Important SCE information – PSPS UPDATE in Mono County

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local government officials.

On Monday, September 16, SCE initiated a Public Safety Power Shutoff (PSPS) for circuits in Mono County due to weather conditions in High Fire Risk Areas (HFRA).

SCE crews have **RE-ENERGIZED** all circuits in your County with the exception of 10 customers on the **BANTA Circuit** near Lee Vining. SCE will notify customers that power has been turned back on.

The following circuits and corresponding communities **are on SCE's PSPS Monitor List for potential PSPS as early as tomorrow morning (Wednesday, September 18):**

**AGNEW Circuit**

- Unincorporated Mono County from Rush Creek to Agnew Lake

**AUTUMN Circuit**

- Mammoth Lakes and Unincorporated communities including Lake Mary

**BANTA Circuit**

- Unincorporated Mono County near Lee Vining

**BIRCHIM Circuit**

- Unincorporated Mono County including the community of Round Valley

**BOBSLED Circuit**

- Mammoth Lakes

**CAIN RANCH Circuit**

- South of Lee Vining

**CHATEAU Circuit**

- Mammoth Lakes Trails

**CONWAY Circuit**

- Unincorporated Mono County

**CRAWFORD Circuit**

- Mammoth Lakes - Old Mammoth

**DYNAMO Circuit**

- Unincorporated Mono County including the community of Willow Springs

**FALLS Circuit**

- Mammoth Lakes Basin - Falls Creek Tract

**GULL LAKE Circuit**

- Unincorporated Mono County

**HURLEY Circuit**

- Mammoth Lakes North

**PICKLE MEADOWS**

- Bridgeport Valley to Pickle Meadows

**REVERSE PEAK Circuit**

- Mammoth Lakes
- Unincorporated Mono County

**RHINEDOLLAR Circuit**

- Unincorporated Mono County near Tuolumne Meadows

**ROBINSON CREEK Circuit**

- Unincorporated Mono County

**SITZMARK Circuit**

- Mammoth Lakes - Core

**SLALOM Circuit**

- Mammoth Lakes - Core

**SLOPE Circuit**

- Mammoth Lakes

**SNOWDRIFT Circuit**

- Mammoth Lakes

**TUFA Circuit**

- Unincorporated Mono County

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, SCE crews are working safely and as quickly as possible to restore service.

Please Note: Weather forecasts on radio and television may provide differing information. SCE is relying on forecast data provided by in-house meteorologists.

For your reference, PDF and GIS circuit maps may be found at [www.sce.com/maps](http://www.sce.com/maps). You may also find all HFRA maps, by County, and a list of circuits by jurisdiction to assist your planning efforts.

If you have any outage-related questions, please call 855-683-9067 to leave a message and we will return your call shortly. This number is for government agencies only. If you have other questions please contact your regular Government Relations Manager. The public should call 800-611-1911 or visit [www.sce.com](http://www.sce.com) if they have questions.

Subject: Important Information from SCE – PSPS IMMINENT SHUTDOWN in Riverside County

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by our local governments.

Due to forecasted fire weather conditions, **SCE may proactively turn off power within the next 1-4 hours** for a Public Safety Power Shutoff to the following circuit in your County though it may occur earlier or later depending on actual weather conditions.

**TOLL circuit**

- Unincorporated Riverside County, including the communities of Whitewater and Bonnie Bell

SCE is also notifying customers on the affected circuit listed above to inform them about the imminent shutoff event.

The following circuits and corresponding areas/communities **remain on SCE's PSPS Monitor List:**

**COACHELLA circuit (including downstream SKYBORNE circuit)**

- Unincorporated Riverside County, including the community of North Palm Springs

**GUNSITE circuit**

1

- 
- Near Big Oaks Canyon and Snow Peak

**PURCHASE circuit**

- Unincorporated communities of Owl, Cabazon and portions of the Desert Hills Outlet Mall

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, SCE crews are working safely and as quickly as possible to restore service.

Please Note: Weather forecasts on radio and television may provide differing information. SCE is relying on forecast data provided by in-house meteorologists.

**Subject:** UPDATE: Important Information from SCE – Possible Public Safety Power Shutoff in Inyo County

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local government officials.

SCE is continuing to monitor weather conditions and continues exploring options for a potential Public Safety Power Shutoff (PSPS) of electrical circuits in High Fire Risk Areas (HFRA) for cities and unincorporated areas in Inyo County.

Please note that while these areas may already be experiencing weather-related outages, SCE has not proactively shut off power at this time.

The following HFRA circuits in your County **remain** on SCE's PSPS monitor list:

- **BIRCHIM**
  - Area of west Bishop and unincorporated Inyo County including the community Round Valley
- **SABRINA**
  - Unincorporated Inyo County including the community of Aspendell

For your reference, PDF and GIS circuit maps may be found at [www.sce.com/maps](http://www.sce.com/maps). Please look at the left-hand navigation links for a drop-down menu for this specific PSPS event to view maps for the circuits listed above. You may also find all High Risk Fire Area (HFRA) maps, by County, and a list of circuits by jurisdiction to assist your planning efforts.

SCE's Incident Management Team (IMT) continues to monitor conditions and coordinate with government agencies. We will continue to update your agency as conditions change.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, SCE crews are working safely and as quickly as possible to restore service.

Please Note: Weather forecasts on radio and television may provide differing information. SCE is relying on forecast data provided by in-house meteorologists.

If you have any questions, please call 855-683-9067 to leave a message and we will return your call shortly. This number is for government agencies only. The IMT Liaison Officer can be reached by email [SCELiaisonOfficer@sce.com](mailto:SCELiaisonOfficer@sce.com). The public should call 800-611-1911 or visit [www.sce.com](http://www.sce.com) if they have questions.

Again, no Public Safety Power Shutoffs have been initiated by SCE at this time.

SCE's Incident Management Team (IMT) continues to monitor conditions. The actual onset of weather conditions and other circumstances beyond our control may impact coordination and notification efforts. As such, there is a possibility that a PSPS event could be called sooner than anticipated, additional circuits could be added, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will attempt to notify you as conditions change.

SCE is also notifying customers on the impacted circuits to inform them about the potential shutoff.

You may also find all HFRA maps, by County, and a list of circuits by jurisdiction to assist your planning efforts.

SCE PSPS Post Event Report  
September 9 to September 19, 2019

SCE's Incident Management Team (IMT) continues to monitor conditions. The actual onset of weather conditions and other circumstances beyond our control may impact coordination and notification efforts. As such, there is a possibility that a PSPS event could be called sooner than anticipated, additional circuits could be added, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will attempt to notify you as conditions change.

SCE is also notifying customers on the impacted circuits to inform them about the potential shutoff.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, SCE crews are working safely and as quickly as possible to restore service.

Please Note: Weather forecasts on radio and television may provide differing information. SCE is relying on forecast data provided by in-house meteorologists.

If you have any questions, please call 855-683-9067 to leave a message and we will return your call shortly. This number is for government agencies only. The Incident Management Team (IMT) Liaison Officer can be reached by email at [SCELiaisonOfficer@sce.com](mailto:SCELiaisonOfficer@sce.com). The public should call 800-611-1911 or visit [www.sce.com](http://www.sce.com) if they have questions.

Again, **no Public Safety Power Shutoffs have been initiated by SCE at this time.**

### Initial Customer Notification

#### Voice:

This is an important safety message from Southern California Edison. Due to projected weather conditions in your area that may cause power outages, S C E is exploring options for a potential Public Safety Power Shut off of electrical circuits in High Fire Risk Areas and, as a precaution, may also pro actively turn off power for public safety in the ^city^ area. S C E has not pro actively turned off any power at this time. Please be prepared with your personal emergency plan. For more information please visit our website at [WWW DOT S C E DOT COM](http://WWW.DOT.SCE.COM). If you see a downed power line, stay away, call 9 1 1, and report this to S C E at 1-800-611-1911. Please press the pound key to repeat this message.

#### SMS/Text:

SCE Safety Alert: Due to projected weather conditions in your area that may cause power outages, SCE is exploring options for a potential Public Safety Power Shutoff (PSPS) of electrical circuits. SCE has not proactively turned off any power at this time. Please be prepared with your personal emergency plan. For more information please visit our website at [WWW.SCE.COM/PSPS](http://WWW.SCE.COM/PSPS). If you see a downed power line, stay away, call 911, and report this to SCE at 1-800-611-1911.

#### TTY:

This is an important safety message from Southern California Edison. Due to projected weather conditions in your area that may cause power outages, SCE is monitoring our system in High Fire Risk Areas and, as a precaution, may also proactively turn off power for public safety in the <city/county variable> area. SCE has not proactively turned off any power at this time. Please be prepared with your personal emergency plan. For more information please visit our website at [WWW.SCE.COM](http://WWW.SCE.COM). If you see a downed power line, stay away, call 911, and report this to SCE at 1-800-611-1911.

#### E-Mail:

This is an important safety message from Southern California Edison

Due to projected weather conditions in your area that may cause power outages, SCE is exploring options for a potential Public Safety Power Shutoff (PSPS) of electrical circuits in High Fire Risk Areas (HFRA) and, as a precaution, may also proactively turn off power for public safety in the <city/county variable> area. SCE has not proactively turned off any power at this time. Please be prepared with your personal emergency plan. For more information please visit our website at [WWW.SCE.COM](http://WWW.SCE.COM). If you see a downed power line, stay away, call 911, and report this to SCE at 1-800-611-1911.

Thank You,  
Southern California Edison

## Update Customer Notification

### Voice:

S C E continues to explore options for a potential public safety power shut off in the ^city^ area. No power has been shut off at this time. We are identifying circuits in that area that might be affected by weather conditions in high fire risk areas, and continue outreach to local officials and customers in advance of a potential decision to shut off power today. Please press the pound key to repeat this message.
