

User Guide: CPUC BEAD Public Dashboard

Last updated October 20th, 2026

1. **Map:** displays all the BEAD project areas in California colored by subgrantee. Clicking on a project area will open a pop-up that has detailed information about each project. Various tools are available on the map, such as zooming in/out and searching by address.
2. **Filter by attribute:** filters by Subgrantee, Technology, or Project ID. For the Technology filter, multiple technology types can be selected.
3. **View by region:** adjusts the view by different geographical regions: County, Congressional District, Senate District, and Assembly District. The map is set by default to County but users can turn on/off different regional layers in the Layers [7] widget.
4. **Share map link:** generates links for embedding, emailing, or copying the URL to a clipboard.
5. **Dashboard tools**
 - a) **Link to user guide:** redirects to this user guide.
 - b) **Change basemap:** options for changing the basemap to others such as dark mode or satellite view.
 - c) **Print:** prints current map with, if applied, filters or changed extents.
6. **Layers:** lists all layers available on the map. Layers marked with are turned off, click on the icon to turn on. By default, County lines, Locations (BSLs and CAIs), and BEAD Final Proposal Areas are turned on. To view locations, either select a project using the filters or zoom in the map.
 - a) : provides detailed information about each layer.
7. **Symbology:** displays all symbology for layers that are turned on.
