

PUBLIC UTILITIES COMMISSION

505 VAN NESS AVENUE
SAN FRANCISCO, CA 94102-3298

May 18, 2020

**NOTICE OF NEW APPLICATIONS FOR CASF INFRASTRUCTURE
GRANT ACCOUNT FUNDING**

To: [Parties on the CASF Distribution List](#)

Summary

On May 4, 2020, the Commission received 54 applications requesting approximately \$533 million in funding from the CASF Broadband Infrastructure Grant Account to provide broadband Internet access to over 22,000 households. Applicants and projects are listed at the end of this notice.

Project summaries and proposed project area maps are posted on the Commission's CASF Infrastructure Grant webpage at:

[CASF Applications - Project Summaries and Maps](#)

Project Challenge Instructions

As required by [Decision \(D\).18-12-018](#), challenges to a project's eligibility must be submitted within 21 days from the date that the notice of application is served on the CASF Distribution List. Pursuant to the ["March 20, 2020 Postponement of the 2020 CASF Infrastructure Application Deadlines"](#) letter, the deadline for submitting challenges for these proposed projects is June 8, 2020.

Challengers must provide a public notice of the challenge to the CASF Distribution List and submit the completed confidential challenge, as detailed below, to the Communications Division Director and Staff at the following email box. Do not send challenge information to individual Commission Staff.

CASF_Application_Questions@cpuc.ca.gov

The confidential challenge must include the following:

- The specific census blocks that are being challenged.
- The geographic location of all households it serves in the challenged area(s). This information must be provided in a plain-text, comma-separated

values (CSV) file, that contains geo-located street address information, including latitude and longitude coordinates.

- Customer billing from one subscriber in each census block of the challenge indicating that the customer received served speeds at least one day prior to the application filing. Additionally, the billing statement must contain sufficient information so that Staff can verify it with the customer.
- An attestation that the households identified above are offered service and have the capability to receive minimum speeds of 6 Mbps download and 1 Mbps upload.

The Commission has delegated to Staff the authority to uphold or deny challenges. Staff will inform the applicant of its determination of the challenge. Incomplete challenges or challenges that are not filed in a timely manner will be denied.

Internet service providers do not need to submit challenges for census blocks shown as ineligible on the Commission’s [Interactive Broadband Map](#). Applicants that have indicated that they wish to rebut the presumption that an area is served will need to provide data to support their claim.
