### **Project Title:**

PST Keddie Mid-Mile / Last-Mile Broadband Project

### **Proposed Project Area Location:**

Keddie area, Plumas County

### **Project Type:**

Hybrid Mid-Mile and Last-mile

### **CASF Funding Requested:**

\$1,583,660 in grant funds

### **Description of the Project:**

To leverage the current PST mid-mile fiber network for which Plumas-Sierra Telecommunications was awarded ARRA and CASF funds, PST is now applying for additional CASF funding to deploy further mid-mile and last-mile broadband networks to serve the Keddie area of Plumas County.

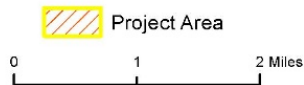

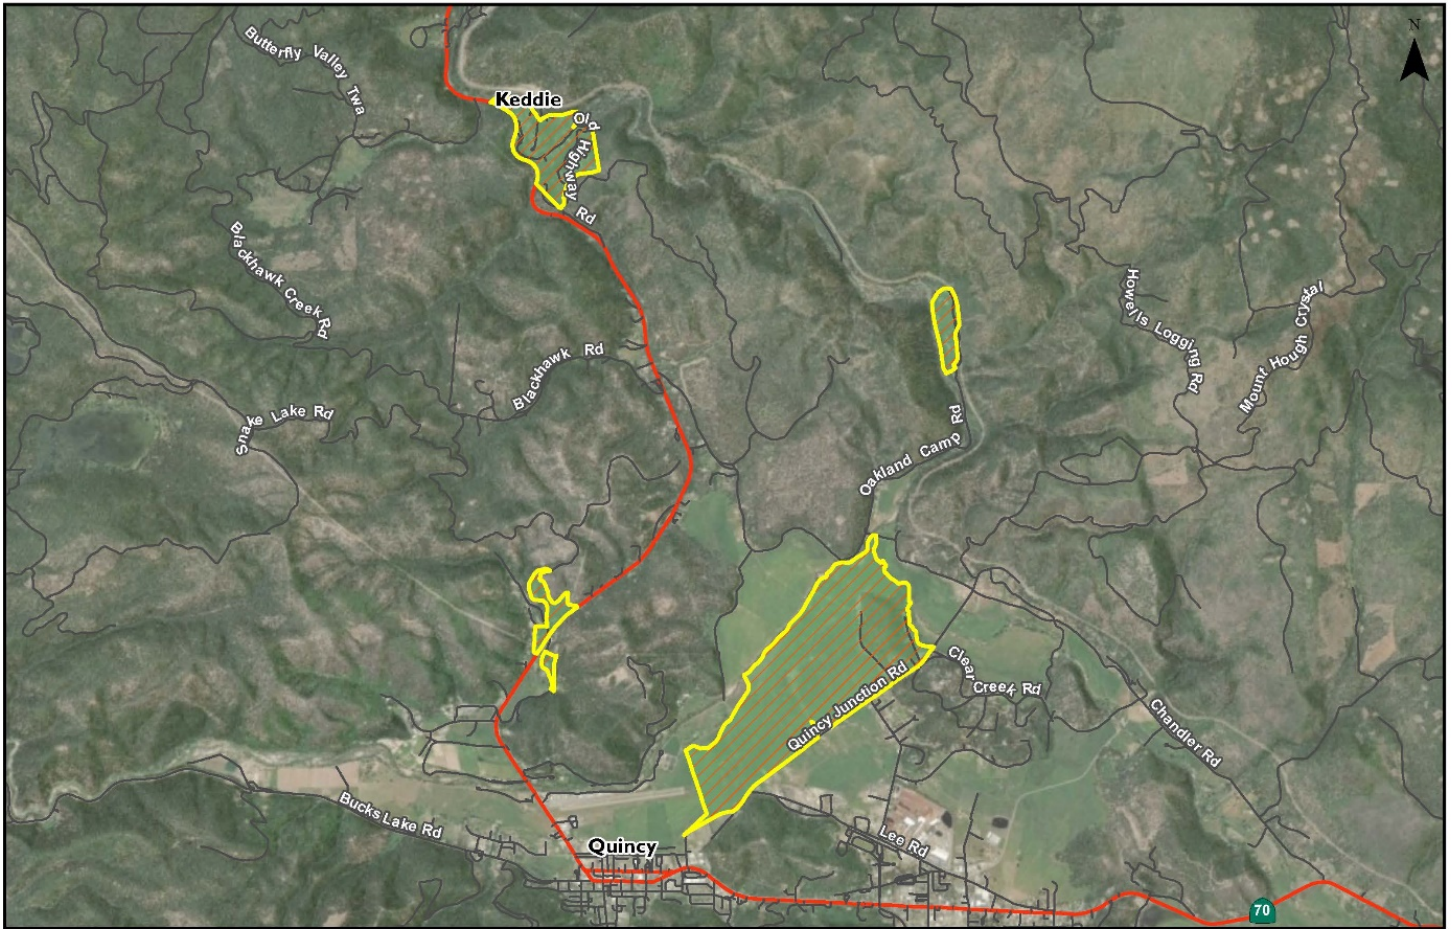

The mid-mile network expansion is vital to reach the deployment area for the last-mile target residences. The last-mile network will use fiber optic wireline technology interconnected with PST's mid-mile fiber network to offer service to 33 households in this unserved area of Plumas County.

Service offerings will include minimum speeds of 10Mbps down/1Mbps up.

The use of fiber optics will allow PST to provide the households in this application with the most current technology, offering an improved quality of life that is not available to these residents now because of their current broadband isolation.

**Map of the Proposed Project:**

**Plumas Sierra Telecom - CASF Project: Keddie**

**Fixed Broadband Served Status by Census Block within project area:**

	<b>Unserved</b>		
	<b>- Slow Service</b>	<b>Unserved - No Service</b>	<b>Unserved Total</b>
<b>Population</b>	0	100	<b>100</b>
<b>Households</b>	0	50	<b>50</b>
<b>Housing Units</b>	0	67	<b>67</b>
<b>Addresses (from Item 4)</b>	0	33	<b>33</b>

This project will bring service to 33 address locations which are outlined in Item 4. These addresses are derived from the most current Plumas County parcel database.

**Census Blocks to be served:**

- 060630001005003
- 060630001005005
- 060630001006030
- 060630001006039
- 060630001006042
- 060630002021065
- 060630002021066
- 060630002021083
- 060630001006002

**Funding Level:**

The area applied for is 100% unserved with no service (Dial-up only) according the CPUC’s 2018 Housing Unit projections. No existing CAF II areas are within project area. Requesting 100% project funding.

The project area includes 9 census blocks in Plumas County in the Community of Keddie along Highway 70, North of Quincy. A few additional eligible census blocks south of Keddie are also included. This area encompasses 1.6 Square Miles.

**Median Household Income:** \$49,485

**Anchor Institutions, Public Safety Locations and Businesses:**

The project area does not include any Anchor Institutions or Public Safety Locations as identified by the current California Interactive Broadband Map.

There are three businesses in the proposed project area which will be served.

- Big O Construction
- Timothy James Dembosz
- Oakland Feather River Camp

**Major Infrastructure and Equipment to be Deployed:**

- 1 Underground cabinet for E7
- 1 Outdoor enclosure
- 1 CISCO Management
- 1 E7 Chasis
- 1 8-port laser
- 1 GIGE card
- 1 GPON card
- 2 rectifiers
- 1 Power inverter for cabinet
- 1 Cienna Switch
- 8 40K SFPs
- 1 80K SFP

**Aerial and Underground Installation:**

- .2 Miles of underground infrastructure
- 24.85 Miles of overhead infrastructure

**Estimated Construction Timeline:** 6 months

**Proposed Broadband Project Plan:**

The PST Keddie Mid-Mile / Last-Mile Broadband Project plans to use fiber optic cable to provide download speeds of up to 100 Mbps and upload speeds of up to 20 Mbps.

PST is leveraging its current mid-mile fiber network for which it was awarded ARRA and CASF funds to deploy this additional mid-mile and last-mile broadband network to serve the Keddie area of Plumas County. The mid-mile network expansion is vital to reach the deployment area for the last-mile target residences because there is no existing mid-mile infrastructure to interconnect with for this project, and without it, PST will not be able to provide service to these areas.

Plumas-Sierra Telecommunications believes that this mid-mile / last-mile broadband project is categorically exempt from CEQA requirements based on the findings of the CEQA analysis conducted for the previous ARRA grant, and because PST is using existing public utility easements considered previously disturbed.

PST is not disputing the Broadband Map depiction of served status.

PST is not seeking Ministerial Review of this project.
