Distribution Costs and Plans
Program Specific
Customer Data

Gas System Planning OIR (R.20-01-007)
Question 5. Supplemental Data part a

Note:
For averages, average across years covered by the most recent GRC proceeding, starting with the test year.

Row	GRC Distribution Pipeline General Costs and Plans Information	Response	Assumptions
1	Most Recent GRC proceeding name	2023 General Rate Case	
2	Most Recent GRC proceeding number	A.21-06-021	
3	Most Recent GRC proceeding years covered, starting with test year	2023 - 2026	For purposes of responding to this request, PG&E interprets “cost” as its expense and capital expenditures forecasts.
4	Open or Upcoming GRC proceeding name if any	A.21-06-021 - see above	
5	Open or Upcoming GRC proceeding number if any	n/a - see above	
6	Open or Upcoming GRC proceeding years covered, starting with test year	n/a - see above	
7	Total distribution main miles	43,775	Data from PG&E's Annual Gas Distribution System PHMSA 7100.1 Report submitted March 1, 2022.
8	Total distribution service miles	34,353	Data from PG&E's Annual Gas Distribution System PHMSA 7100.1 Report submitted March 1, 2022. Reflects the total number of services (3,649,545) multiplied by row 9.
9	Average length of service pipeline (miles per service)	0.0094	The average service length from PG&E's Annual Gas Distribution System PHMSA 7100.1 Report submitted March 1, 2022 (49.7 feet) divided by 5,280 feet to convert to miles.
10	Total distribution main pipeline miles to be replaced per year	234	Average 2023-2026 forecast for Pipeline Replacement Programs (GPRP MAT 14A, Plastic Pipeline Replacement MAT 14D, and Reliability Main Replacement MAT 50A). See PG&E's 2023 GRC Application (A. 21-06-021), Exhibit (PG&E-3), WP 4-27 to WP 4-29 (as served February 28, 2022).
11	Total distribution service pipeline miles to be replaced per year	8	Average 2023-2026 forecast for Reliability Service Replacement Program (MAT 50B) multiplied by row 9. See PG&E's 2023 GRC Application (A. 21-06-021), Exhibit (PG&E-3), WP 4-30 (as served February 28, 2022). This excludes services replaced as part of pipeline replacement projects and leaking service replacements.
12	Total distribution main pipeline miles to be added per year	8.75 miles capacity	Reflects Capacity Mains (MAT 47B) forecast of 46,200 feet of main installed each year divided by 5,280 to convert feet to miles. See PG&E's 2023 GRC Application (A. 21-06-021), Exhibit (PG&E-3), WP 11-38 (as served February 28, 2022). This excludes New Business and Work at the Request of Others (WRO). The New Business forecast is based on the number of connects and not miles. The WRO forecast is based on a historic programmatic average and is also not based in miles.
13	Total distribution service pipeline miles to be added per year	n/a	Not available as the 2023 GRC forecast (2023-2026) for Distribution Capacity and New Business/WRO are not forecast in terms of services.

14	Number of new regulator stations to be built during GRC period	12	Reflects the Capacity Regulator Station (MAT 47C) 2023-2026 forecast total for new regulator stations installed. See PG&E's 2023 GRC Application (A. 21-06-021), Exhibit (PG&E-3), WP 11-38 (as served February 28, 2022).
15	Number of regulator stations to be replaced during GRC period	100	Reflects the 2023-2026 forecast total for Regulator Stations Rebuilds (MAT 50C). Does not include High Pressure Regulator (HPR) type stations because the HPR forecast also includes farm taps. See PG&E's 2023 GRC Application (A. 21-06-021), Exhibit (PG&E-3), WP 6-55 (as served February 28, 2022).

Loss of containment severity based on failure mode (e.g. threat), population density, migration and accumulation, and operating pressure.
39	Risk Scoring Discussion and Further Information	Discussion of Risk Scoring Approach	For each segment the risk of failure (RoF) (units: SIFs/100,000 years) is calculated at a sub-threat level with an individual likelihood of failure (LoF) (units: leaks/year) and consequence of failure (units: serious injuries or fatalities or SIFs/100,000 leaks). The total RoF and LoF on a given segment was obtained by summing the sub-threat RoF and LoF values. The total LoF and RoF values were normalized by each segment's length before calculating statistics because of the effect of segment length on these values which tends to skew LoF and RoF towards larger segments. The LoF and RoF values are presented above in normalized units (LoF: leaks/mile-year; RoF: SIFs/100,000 mile-year). This summation approach, however, cannot be applied to Consequence of Failure (CoF) because each sub-threat CoF is dependent upon the mode of failure. For example a loss of containment due to excavation damage is expected on average to result in more injuries or fatalities than a corrosion leak. Therefore summing the sub-threats' CoF values per segment is not meaningful. For the purposes of providing minimum and maximum possible CoF values individual subthreat CoF values were used. An "effective" CoF was calculated by dividing the normalized total RoF score by the normalized total LoF score for each segment. This "effective" CoF cannot be derived from a segment's underlying CoF factors as described in the row above. Descriptive statistics were calculated for all in-scope segments under each program. Order Instituting Rulemaking to Establish Policies, Processes, and Rules to Ensure Safe and Reliable Gas Systems in California and Perform Long-Term Gas System Planning.	R.20-01-007 (Filed January 16, 2020)

PACIFIC GAS AND ELECTRIC COMPANY'S (U 39 G) RESPONSE TO ADMINISTRATIVE LAW JUDGE'S RULING SEEKING REVISED DATA FROM CALIFORNIA'S GAS UTILITIES (PUBLIC VERSION)

Pacific Gas and Electric Company ("PG&E") respectfully provides its Response to the Administrative Law Judge's Ruling Seeking Revised Data from California's Gas Utilities, issued on September 21, 2022 (Ruling).[1] PG&E's Response to the Ruling consists of the following attachments, which are available through the accompanying Notice of Availability:

1) Attachment A to this Response provides the additional information requested in the Ruling at Appendix A.1 (Risk Assessment Methods), including a summary of PG&E's Distribution Integrity Management Program (DIMP) procedure and risk assessment methodology;
2) Attachment A to the Response also provides the additional information requested in the Ruling at Appendix A.2 (2021 PHMSA Distribution Pipeline Mileage and Repairs Report);

[1] Pursuant to the Administrative Law Judge Ruling Granting with Modification Joint Motion of Southern California Gas Company, San Diego Gas & Electric Company, PG&E and Southwest Gas Corporation for an Extension of Time to Respond to the Administrative Law Judge's Ruling Seeking Revised Data from California's Gas Utilities, issued on October 17, 2022, PG&E has filed its Response on November 4, 2022.

3) Attachment B to this Response provides corrections and updates to the information provided in PG&E's May 20, 2022 Response, as well as additional information, as directed in the Ruling at Appendix B (Utility-Specific). Attachment B contains the information requested in the Ruling to the extent the information is available in PG&E's data systems.[2] Also, where applicable PG&E has stated updated assumptions in Attachment B that it made in providing the information requested in the Ruling. Attachment B is provided in PDF format solely for the record of this proceeding. Due to the size of the data fields and the amount of data provided, PG&E recommends that parties view the data contained in PG&E's Response using the website pathway described in PG&E's accompanying Notice of Availability.

4) Contemporaneously with this Response, PG&E is filing a Motion for Leave to File Under Seal Confidential Materials Filed in Response to Administrative Law Judge's Ruling Seeking Revised Data from California's Gas Utilities (Motion). The confidential customer gas consumption data information described in the Motion, consistent with the Administrative Law Judge's Ruling on Gas Utilities' Confidentiality Claims Concerning Customer Gas Consumption and Infrastructure Data and Order Requiring Resubmission of Data, issued on October 28, 2022, is in Attachment B only and has been redacted from the public version of PG&E's Response.

[2] As PG&E does not design and operate its gas system based on census tracts, it has developed the requested census tract data for purposes of responding to the Ruling.

5) Contemporaneously with this Response, PG&E is filing and serving a Notice of Availability that provides a website pathway for parties to view and download the "active" electronic files included in PG&E's Response (public version) in comma separated values (CSV) or Excel formats.

Respectfully Submitted,
