BEFORE THE PUBLIC UTILITIES COMMISSION
OF THE STATE OF CALIFORNIA

Order Instituting Rulemaking to Establish Policies, Processes, and Rules to Ensure Safe and Reliable Gas Systems in California and Perform Long-Term Gas System Planning. (U 39 G)	Rulemaking No. 24-09-012 (Issued October 4, 2024)

PACIFIC GAS AND ELECTRIC COMPANY'S (U 39 G) RESPONSE TO ADMINISTRATIVE LAW JUDGES' RULING SEEKING DATA FROM GAS UTILITIES (PUBLIC VERSION)

Pacific Gas and Electric Company (PG&E) respectfully provides its Response to the Administrative Law Judges' Ruling Seeking Data from Gas Utilities, issued on November 22, 2024 (Ruling).[1]

PG&E's Response to the Ruling consists of the following attachments, which are available through the accompanying Notice of Availability:

1) Attachment A to this Response is the public version of the response that PG&E filed on May 20, 2022 in Rulemaking (R.) 20-01-007. Attachment A is provided in PDF format solely for the record of this Rulemaking proceeding. Due to the size of the data fields and the amount of data provided, PG&E recommends that parties view the data contained in Attachment A using the website pathway described in PG&E's accompanying Notice of Availability. Pursuant to the Ruling, PG&E also is contemporaneously serving the unredacted, confidential version of Attachment A to members of the service list for this proceeding with Commission email addresses.[2]

[1] Pursuant to the Email Ruling R.24-09-012 Partially Granting the Joint IOUs' Motion for Extension of Time for Data from Gas Utilities, issued on December 20, 2024, PG&E has filed its Response on January 13, 2025.

[2] Ruling at 3; see also PG&E's Motion for Leave to File Under Seal Confidential Materials Filed in Response to Revised Administrative Law Judge's Ruling Seeking Data from California's Gas Utilities, filed in R.20-01-007 on May 20, 2022, and Administrative Law Judge's Ruling on Gas Utilities' Confidentiality Claims Concerning Customer Gas Consumption and Infrastructure Data and Order

2) Attachment B to this Response is the public version of the response that PG&E filed on November 4, 2022 in R.20-01-007, as a compliance filing in the record of this Rulemaking. Attachment B is provided in PDF format solely for the record of this proceeding. Due to the size of the data fields and the amount of data provided, PG&E recommends that parties view the data contained in Attachment B using the website pathway described in PG&E's accompanying Notice of Availability. Pursuant to the Ruling, PG&E also is contemporaneously serving the unredacted, confidential version of Attachment B to members of the service list for this proceeding with Commission email addresses.[3]

3) Attachment C to this Response (public version) provides the information directed in the Ruling at Appendix A. Attachment C contains the information identified in the Ruling at Appendix A to the extent the information is available in PG&E's data systems. Also, where applicable PG&E has stated updated assumptions in Attachment C that it made in providing the information identified in the Ruling. Attachment C is provided in PDF format solely for the record of this proceeding. Due to the size of the data fields and the amount of data provided, PG&E recommends that parties view the data contained in PG&E's Response using the website pathway described in PG&E's accompanying Notice of Availability. Pursuant to the Ruling, PG&E also is contemporaneously serving the unredacted, confidential version of Attachment C to members of the service list for this proceeding with Commission email addresses.[4]

4) Contemporaneously with this Response, PG&E is filing a Motion for Leave to File Under Seal Confidential Materials Filed in Response to Administrative Law Judges' Ruling Seeking Data from Gas Utilities (Motion). The confidential customer gas

Requiring Resubmission of Data, issued in R.20-01-007 on October 28, 2022.

[3] Ruling at 3; see also PG&E's Motion for Leave to File Under Seal Confidential Materials Filed in Response to Administrative Law Judge's Ruling Seeking Revised Data from California's Gas Utilities, filed in R.20-01-007 on November 4, 2022.

[4] Ruling at 3.

consumption data information described in the Motion, consistent with the Ruling, has been redacted from the public version of Attachment C to PG&E's Response.

5) Contemporaneously with this Response, PG&E is filing and serving a Notice of Availability that provides a website pathway for parties to view and download the "active" electronic files included in PG&E's Response (public version) in comma separated values (CSV) or Excel formats.

Respectfully Submitted,

By: */s/ Jonathan D. Pendleton*

Order Instituting Rulemaking to Establish Policies, Processes, and Rules to Ensure Safe and Reliable Gas Systems in California and Perform Long-Term Gas System Planning. U 39 G	R.20-01-007 (Filed January 16, 2020)

PACIFIC GAS AND ELECTRIC COMPANY'S (U 39 G) RESPONSE TO REVISED ADMINISTRATIVE LAW JUDGES' RULING SEEKING DATA FROM CALIFORNIA'S GAS UTILITIES (PUBLIC VERSION)

Pacific Gas and Electric Company ("PG&E") respectfully provides its Response to the Revised Administrative Law Judges' Ruling Seeking Data from California's Gas Utilities, issued on March 1, 2022 (Revised Ruling). PG&E's Response to the Revised Ruling consists of the following:

1) Attachment A to this Response is a redacted, public version of the data PG&E is providing in response to the Revised Ruling. Attachment A contains the information requested in the Revised Ruling to the extent the information is available in PG&E's data systems. Also, where applicable PG&E has stated certain assumptions in Attachment A that it made in providing the information requested in the Revised Ruling. Attachment A is provided in PDF format solely for the record of this proceeding. Due to the size of the data fields and the amount of data provided, PG&E recommends that parties view the data contained in PG&E's Response using the website pathway described in PG&E's accompanying Notice of Availability.
2) Contemporaneously with this Response, PG&E is filing a Motion for Leave to File

Under Seal Confidential Materials Filed in Response to the Revised Ruling (Motion). The confidential information described in the Motion has been redacted from the public version of PG&E's Response.

3) Contemporaneously with this Response, PG&E is filing and serving a Notice of Availability that provides a website pathway for parties to view and download the "active" electronic files included in PG&E's Response (public version) in comma separated values (CSV) or Excel formats.

Respectfully Submitted,

By: */s/ Jonathan D. Pendleton*

Attachment A

Attachment 1 - Question 1: Gas System Census Tract Data – PG&E.csv

“Gas System Census Tract Data – PGE”

Question 1 - Data Assumptions

Column Name	Data Assumptions
TractID	
County	
City	
ZipCode	
ClimateZone	Based on Billing Thermal Unit (BTU) information in meters dataset, which was joined to Services to get the appropriate GEOID
TransmZone	
HCA	Buffered HCA lines from Transmission out to 660' to find any intersecting Distribution lines
MCA	Buffered MCA lines from Transmission out to 660' to find any intersecting Distribution lines
Services	Active services only (no stubs)
LargeCustomers	PG&E has a more conservative definition of "large volume customer" (LVC) than what is stated by the question, and the number of LVCs per PG&E's definition is what will be reported
DemandNodes	Please note, most systems with less than 500 customers are not modeled within Synergi.
TotalLoad	There was not a direct match between meter ID location and census tract id for all customers. Data was provided for known customers.
PeakLoad	Based on historical systemwide noncore peak hour of Dec 15, 2021 at 10am. Noncore usage is metered hourly. All other customers are metered and billed monthly so were excluded.
LoadChange	Source; teradata Census tract changes year to year.
PressureDist	Pressure districts can span multiple census tracts and will be counted in each census tract

HiPressMains	Transmission branches for Farm Tap services will not be included, so this will be 0
MedPressMains	This includes the entire Gas Distribution Main dataset
HiPressServices	These don't exist in the Services dataset for Gas Distribution, so this will be 0
MedPressServices	This includes the entire Gas Service dataset
DiamUnk	Distribution Main mileage based off of Shape_Length/5280, Service mileage based off of Count Weight multiplied by average service length for reporting year 2021: (Count Weight*49.7)/5280.
Diam2OrLess	Distribution Main mileage based off of Shape_Length/5280, Service mileage based off of Count Weight multiplied by average service length for reporting year 2021: (Count Weight*49.7)/5280.
Diam2to4	Distribution Main mileage based off of Shape_Length/5280, Service mileage based off of Count Weight multiplied by average service length for reporting year 2021: (Count Weight*49.7)/5280.
Diam4to8	Distribution Main mileage based off of Shape_Length/5280, Service mileage based off of Count Weight multiplied by average service length for reporting year 2021: (Count Weight*49.7)/5280.

Diam8to12	Distribution Main mileage based off of Shape_Length/5280, Service mileage based off of Count Weight multiplied by average service length for reporting year 2021: (Count Weight*49.7)/5280.
DiamOver12	Distribution Main mileage based off of Shape_Length/5280, Service mileage based off of Count Weight multiplied by average service length for reporting year 2021: (Count Weight*49.7)/5280.
EarlyAldylA	Used Installed Completion Date
LaterAldylA	Used Installed Completion Date. Aldyl-A is present post-1985 but not included.
UnkDateAldylA	All unknown Installed Completion Dates for Plastic Type = Aldyl-A
NAPlastic	Includes all non-Aldyl-A plastic
CPSteel	Queried based off of CP Type <> 'Unprotected'; includes unknowns as that relates to the type of protection being unknown, not the status of the protection itself
NCPSteel	Queried based off of CP Type = 'Unprotected'
Copper	There are no copper mains in the system so this will be 0
Iron	Only includes wrought iron per the description (does not include cast iron)
Oldest	
HighestRiskMains	Use: Liklihood of Failure (LoF), assumes top 5 % of overall system LoF values.
HighRiskMains	Use:Liklihood of Failure (LoF), assumes mileage count for those mains that have LoF scores with the 76-100% (highest quartile) of overall system LoF values

UpperRiskMains	Use:Likelihood of Failure (LoF), assumes mileage count for those mains that have LoF scores with the 51-76% (second highest quartile) of overall system LoF values
LowerRiskMains	Use:Likelihood of Failure (LoF), assumes mileage count for those mains that have LoF scores with the 26-50% (second lowest quartile) of overall system LoF values
LowRiskMains	Use:Likelihood of Failure (LoF), assumes mileage count for those mains that have LoF scores with the 0-25% (lowest quartile) of overall system LoF values
HighestConsqMains	Use: Consequence of Failure (CoF), assumes top 5 % of overall system CoF values.
HighConsqMains	Use: Consequence of Failure (CoF), assumes mileage count for those mains that have CoF scores with the 76-100% (highest quartile) of overall system CoF values
UpperConsqMains	Use: Consequence of Failure (CoF), assumes mileage count for those mains that have CoF scores with the 51-75% (second highest quartile) of overall system CoF values
LowerConsqMains	Use: Consequence of Failure (CoF), assumes mileage count for those mains that have CoF scores with the 26-50% (second lowest quartile) of overall system CoF values
LowConsqMains	Use: Consequence of Failure (CoF), assumes mileage count for those mains that have CoF scores with the 1-25% (lowes quartile) of overall system CoF values
HighestRiskServices	Use: Likelihood of Failure (LoF), assumes top 5 % of overall system LoF values.
HighRiskServices	Use:Likelihood of Failure (LoF), assumes mileage count for those mains that have LoF scores with the 76-100% (highest quartile) of overall system LoF values
UpperRiskServices	Use:Likelihood of Failure (LoF), assumes mileage count for those mains that have LoF scores with the 51-76% (second highest quartile) of overall system LoF values

LowerRiskServices	Use:Likelihood of Failure (LoF), assumes mileage count for those mains that have LoF scores with the 26-50% (second lowest quartile) of overall system LoF values
LowRiskServices	Use:Likelihood of Failure (LoF), assumes mileage count for those mains that have LoF scores with the 0-25% (lowest quartile) of overall system LoF values
HighestConsqServices	Use: Consequence of Failure (CoF), assumes top 5 % of overall system CoF values.
HighConsqServices	Use: Consequence of Failure (CoF), assumes mileage count for those mains that have CoF scores with the 76-100% (highest quartile) of overall system CoF values
UpperConsqServices	Use: Consequence of Failure (CoF), assumes mileage count for those mains that have CoF scores with the 51-75% (second highest quartile) of overall system CoF values
LowerConsqServices	Use: Consequence of Failure (CoF), assumes mileage count for those mains that have CoF scores with the 26-50% (second lowest quartile) of overall system CoF values
LowConsqServices	Use: Consequence of Failure (CoF), assumes mileage count for those mains that have CoF scores with the 1-25% (lowes quartile) of overall system CoF values
AvMainRisk	Average calculated likelihood of failure (LoF), per year, of the entire service territory.
AvServiceRisk	Average calculated likelihood of failure (LoF), per year, of the entire service territory.

AvMainConsq	Average calculated consequence of failure (CoF), per year, of the entire service territory.
AvServiceConsq	Average calculated consequence of failure (CoF), per year, of the entire service territory.
AvMainRiskScore	Average calculated risk score, in terms of significant injury or fatality (SIF), per year.
AvServiceRiskScore	Average calculated risk score, in terms of significant injury or fatality (SIF), per year.
AvMainPressure	Will use NOP. Average pressure is based on systems with known NOP.
AvMainYear	Will use oldest date we have attributed to each material between mains and services for all unknown installation dates (1892 for steel, 1921 for wrought iron, 1927 for cast iron, 1941 for copper, 1965 for plastic)
AvServiceYear	Will use oldest date we have attributed to each material between mains and services for all unknown installation dates (1892 for steel, 1921 for wrought iron, 1927 for cast iron, 1941 for copper, 1965 for plastic)
AvSurvey	Based on last leak surveyed date of the leak survey grid the service is associated with
AvMainLeaks	Open leaks only. Leaks associated with regulator stations included
AvServiceLeaks	Open leaks only. Leaks associated with customer regulators included
HistAvMainHazLeaks	Will only provide up to 2020. Leaks associated with regulator stations included.
HistAvServiceHazLeaks	Will only provide up to 2020. Leaks associated with customer regulators included
RetiredMain	Based off of abandoned pipe dataset. Does not include removals
RetiredService	Based off of abandoned pipe dataset. Does not include removals. Utilized average service length (49.7') in combination with total counts.

PlanGRCReplaceMains	Sum of main mileage inside WIP clouds with PM order numbers from DEP (as of 3/25/2022) in MATs 14A (pre-1941 steel) and 14D (pre-1985 plastic). Excluded MAT 50A order numbers (post-1940 steel and post-1984 plastic) to improve accuracy of column BV.
PlanGRCReplaceServices	Not available for main replacement programs (14A, 14D, and 50A) because those projects are recorded in units of feet of main, not services. For MAT 50B, count of WIP clouds with PM order numbers from DEP (as of 3/25/2022) in MAT 50B.
EstGRCReplaceMains	Subtract known 2023-2026 replacement mileage (column BT = 390 miles) from 2023-26 forecast (875 miles). For eligible mileage in each census tract, apply percentage of remaining 2023-26 forecast mileage (485 miles) to systemwide mileage of pre-1941 steel and pre-1985 plastic (8,069 miles): 6.01%. Excluded MAT 50A because of the relatively small percentage of forecast mileage (60 miles) to systemwide mileage of post-1940 steel and post-1984 plastic (35,652 miles): 0.16%
EstGRCReplaceServices	Not available for main replacement programs (14A, 14D, and 50A) because those projects are recorded in units of feet of main, not services. For MAT 50B, the total GRC forecast for 2023-2026 is 3,200 services, which is approximately 30 miles of pipe (using an average service length of 49.7 feet). After subtracting the planned 50B service replacement mileage in column BU, the remaining estimated mileage is 29 miles. This is less than 0.1% of the systemwide service population. Therefore, a prorated estimate of service replacement mileage for each census tract was not performed.
GRCReplaceMains2030	Not available; main replacement projects are not currently known for this timeframe.

GRCReplaceServices2030	Not available; main replacement programs (14A, 14D, and 50A) are recorded in units of feet of main, not services.
GRCReplaceMainsPrograms	Not available; main replacement projects are not currently known for this timeframe.
GRCReplaceServicesPrograms	Not available; main replacement programs (14A, 14D, and 50A) are recorded in units of feet of main, not services.
RecentMains	Will include all 2021 jobs posted to GD GIS by 1/9/2022
RecentServices	Will include all 2021 jobs posted to GD GIS by 1/9/2022
PlannedMains	New D main is installed based on customer demand (no planned work). 2021 historical main installation is provided
PlannedServices	New services are installed based on customer demand (no planned work). 2021 historical main installation is provided
MainValves	Will include all valve types
HiBranches	There are no Distribution line branching points >60 psi, so this will be zero
RegStationType	MAOP measured in Water Column will be converted to psi to be classified in the given High, Medium, and Low pressure designations. Any unknown MAOP will be classified as 'Unknown'.

RegStationCustomers	+ T & D Stations with Synergi model - Data readily available for # of customers by hydraulically independent system (HIS) but not granularity of # of customers supplied by specific reg station for HIS served by multiple stations. For example, if Reg A + B both feed 100 customers total in HIS C, Reg A = 100 custs and Reg B = 100 custs. + T & D Stations without Synergi model (not required for HIS less than 500 custs), customer count data is not readily available and HIS with “<500” in name listed as "<500". + Farm Taps - Assumes 1 to 2 customers
RegStationAge	Will calculate age in years based on the Installed Completion Date. Unknowns (1/1/1800) will be reported as unknown ages. 0 value refers to age less than 1 year.
RegStationGRC	2023-2026 GRC unit forecast is based on generic number of stations needed to mitigate or manage the risk and is at the programmatic level. It is not based on exact station location. Two exceptions are the Simple Station Rebuilds and Complex Station Rebuilds where stations are identified ahead of time. The locations for those 2 programs are included in this analysis.
RegStationReplacement	Stations for rebuild/replacement/relocation/new constructions beyond 2026 have not been identified. They will be forecasted and identified as part of the 2027 Rate Case process.
TransmMiles	
TransmWallLoss	Wall loss call-outs from the latest ILI (MFL tool) projects on each pipeline that were not excavated.
AvTransmDiam	
AvTIMPScore	Risk output from the 2020 annual risk run converted into mileage percentiles, output was certified in 2021.
CompressorStn	Compressor stations that are solely used to compress gas on the transmission lines are included. Storage compressors are not included.
SmallTransmInfr	Includes farm taps, HPRs, distribution regulator stations with inlet MAOP above 60 psig, transmission regulator stations, LVCs, meter stations as show in GT/GD-GIS. Also includes valve lots and automated valve lots from GT-GIS or that have an operating diagram.

LargeTransmInfr	1. Storage locations were consolidated to include compression, processing facilities and associated gas wells. 2.PG&E expects to begin decommissioning or complete sale efforts related to the Pleasant Creek gas storage facility in 2022, but included in this list. 3. Gill Ranch gas storage field excluded from the list as PG&E does not operate the field. 4. PG&E has no wholesale gas receipt points since it does not resell gas to end-use customers.
