WHY ATTEND?

Senate Bill 1221 allows up to 30 pilot projects across California to help transition some neighborhoods from natural gas to cleaner, zero-emission energy options. The CPUC is developing the rules for this program in Rulemaking 24-09-012.

This virtual event gives you a chance to share your thoughts on which neighborhoods should be considered as priority decarbonization zones. These zones are areas where clean energy projects could be proposed in the future. We want to hear your input on local environmental hazards, access to heating and cooling, health considerations, community barriers to decarbonization, and diversity and equity considerations outlined in Senate Bill 1221.

HOW WOULD THIS IMPACT CUSTOMERS?

These efforts may influence future energy infrastructure and programs that support cleaner, safer energy options for communities, including disadvantaged and low-income neighborhoods.
