

**SOUTHERN CALIFORNIA EDISON  
SEMI-ANNUAL COMMUNITY SOLAR GREEN TARIFF PROGRAM REPORT  
FOR PERIOD JANUARY THROUGH JUNE 2021**

**Background**

Southern California Edison Company (“SCE”) hereby submits its Community Solar Green Tariff (“CSGT”) semi-annual report in accordance with Resolution E-4999 (“Resolution”).

Decision (“D.”)18-06-027 (“Decision”) also specifies that utilities work with the Energy Division (“ED”) on reporting requirements and that the ED may modify such requirements as necessary.<sup>1</sup> As specific reporting requirements were not designated in the Decision, the Resolution provides standardized reporting requirements to participating investor-owned utilities (“IOUs”) that include a semi-annual CSGT programs progress report with enrollment and subscription details by the program.<sup>2</sup> This filing is the semi-annual report described in the Resolution. The reporting period for the semi-annual report covers January 1, 2021, through June 30, 2021.

**Discussion**

SCE’s CSGT (also referred to as “Local Green Saver Program”) has a program capacity allocation of 14.63 MW and provides a 20% electric bill discount to low-income and non-low-income customers who are located within an eligible census tract and a specified distance from the community solar project built under the program.

On February 27, 2020, SCE launched its first CSGT solicitation, resulting in a successful offer of a 3 MW CSGT project with Visalia CSG, LLC, which SCE submitted for Commission approval.<sup>3</sup> This project is due to begin delivery on October 1, 2022.

To date, SCE has completed three CSGT solicitations, procuring a total of 3 MW of capacity for the CSGT program. , The latest solicitation took place on March 25, 2021 , where no additional successful bids were obtained.

As of June 30, 2021, there were no income and non-income qualified customers subscribed or on the waitlist. Table 1 summarizes the participation level, which includes the

<sup>2</sup> Resolution at pp. 39-40, Reporting Requirements; id., OP 1.g. at 63. The Resolution provides that semi-annual reports shall be reported to the ED Central Files.

<sup>3</sup> SCE Advice Letter 4297-E, approved on October 23, 2020.

**SOUTHERN CALIFORNIA EDISON  
SEMI-ANNUAL COMMUNITY SOLAR GREEN TARIFF PROGRAM REPORT  
FOR PERIOD JANUARY THROUGH JUNE 2021**

number of income-qualified customers subscribed and the total subscribed capacity of those customers, whether a waitlist of non-income qualified customers exists or not and if so, how many customers are on that waitlist if sponsor(s) are receiving bill credits what their subscription capacity, and the number of master-metered accounts participating and the total capacity allocated to those master-metered accounts.

For this report, it is important to note that “Number of Customers Subscribed” is defined as customers who are actively enrolled in a CSGT program. Customers who are on the waitlist are not counted towards the CSGT program subscription.

**Table 1:  
CSGT Participation Levels**

CSGT Project Name	Project Capacity (MW)	Income Qualified		Non-Income Qualified		Sponsor(s)	Master-Metered Accounts	
		# of Customers Subscribed	Capacity Allocated (MW)	Does a Waitlist Exist? (Y or N)	# of Customers on Waitlist	Capacity Subscription (MW)	# of Accounts	Total Capacity Subscribed
Visalia CSG	3	0	0	N	0	0	0	0
						0		
						0		

Sponsors may be eligible to subscribe for up to 25% of a CSGT project once the income-qualified participation threshold of 50% has been met. At this time, the Visalia CSG project sponsor(s) have opted not to subscribe to the project and instead, their wishes are to make available as much capacity as possible to income-qualified customers.

For this reporting period, master-metered customers were not eligible to participate in the CSGT program because 50% of the Visalia CSG project’s capacity has not been subscribed to low-income customers as required by the CSGT program.
