COMMUNITY SOLAR GREEN TARIFF
SECOND QUARTER 2021 REPORT**

Background

Southern California Edison Company (“SCE”) hereby submits its Disadvantaged Communities Green Tariff (“DAC-GT”) and Community Solar Green Tariff (“CSGT”) quarterly report in accordance with Resolution E-4999 (“Resolution”).

Decision (“D.”) 18-06-027 (“Decision”) also specifies that utilities work with the Energy Division (“ED”) on reporting requirements and that the ED may modify such requirements as necessary.¹ As specific reporting requirements were not designated in the Decision, the Resolution provides standardized reporting requirements to participating investor-owned utilities (“IOUs”) that include a quarterly DAC-GT and CSGT programs progress report with enrollment and subscription details by the program.² This filing is the quarterly report described in the Resolution. The reporting period for the quarterly report covers April 1, 2021, through June 30, 2021.

Discussion

SCE’s DAC-GT (also referred to as the “Green Saver Program”) has a program capacity allocation of 56.5 megawatts (MW). This program provides a 20% bill discount to California Alternate Rates for Energy Program (“CARE”) or Family Electric Rate Assistance Program (“FERA”) eligible customers located in Disadvantaged Communities (DACs).³ SCE’s CSGT (also referred to as “Local Green Saver Program”) has a program capacity allocation of 14.63 MW and provides a 20% electric bill discount to low-income and non-low-income customers who are located within an eligible census tract and a specified distance from the community solar project built under the program.

On February 27, 2020, SCE launched its first DAC-GT and CSGT solicitation, resulting in a successful offer of a 3 MW CSGT project with Visalia CSG, LLC, which SCE submitted for Commission approval.⁴ To date, SCE has launched two additional DAC-GT and CSGT

¹ Decision at p. 55, section 6.4.6 - Reporting.

² Resolution at pp. 39-40, Reporting Requirements; id., OP 1.f. at 63. The Resolution provides that the quarterly reports are to be filed with the Commission.

³ Defined as the top 25% most impacted census tracts statewide, as well as an additional 22 census tracts in the highest 5% CalEnviroScreen’s Pollution Burden that does not have an overall CalEnviroScreen score because of unreliable socioeconomic or health data.

⁴ SCE Advice Letter 4297-E, approved on October 23, 2020.

solicitations, with the latest launch taking place on March 25, 2021, with no successful bids obtained.

In summary, to date, SCE has completed three DAC-GT and CSGT solicitations, procuring a total of 3 MW of capacity for the CSGT program and 0 MW for the DAC-GT program. Table 1 summarizes the total procured and online solar project capacity, the customer subscribed count, and CARE/FERA enrollments for each program

For this report, “Customers Subscribed” is defined as customers for which capacity has been assigned in either the DAC-GT or CSGT programs. Customers who are on the waitlist are not counted as being subscribed to a program. There are also zero enrollments into the CARE/FERA program since there are no waitlist or enrolled customers in both programs during this reporting period.

**Table 1
DAC-GT and CSGT Program Summary
Second Quarter 2021**

	CSGT Q2 2021	CSGT Cumulative	DAC-GT Q2 2021	DAC-GT Cumulative
Capacity Procured (MW)	0	3	0	0
Capacity Online (MW)	0	0	0	0
Customers Subscribed	0	0	0	0
CARE/FERA Enrollments	0	0	0	0

Table 2 details the project that has been procured to date, and the project characteristics, including project name, what program the project was procured for, the project’s DAC census tract number, and the project capacity. Currently, there is one (1) project for the CSGT program and zero (0) projects for the DAC-GT program. The CSGT project, Visalia CSG, was unable to receive city approval for their original project site; however, they have successfully reached an agreement with SCE to change their site location, to change the expected initial delivery date, and to update associated provisions through an amendment executed on June 18, 2021. The new project site relocated from census tract 6107001003 to census tract 6107001602, and the expected initial delivery date has changed from February 1, 2022, to October 1, 2022.

SECOND QUARTER 2021 REPORT**

**Table 2
DAC-GT and CSGT Individual Project Details
Second Quarter 2021**

Project Name	Program	Project Capacity (MW)	Project Location (Census Tract)	Project Location (City)
Visalia CSG	CSGT	3	6107001602	Visalia

Table 3 displays the cumulative number of active customers participating in each program as of June 30, 2021. Note that the census tract numbers displayed do not cover the entire SCE territory at this time since it does not have an approved DAC-GT project. Instead, the table reflects only the census tracts eligible to participate in the Visalia CSG project site location for the CSGT program. As noted in the table, from April 1, 2021, through June 30, 2021, SCE has zero (0) enrollments for both the CSGT project and the DAC-GT.

Regarding the CSGT program, SCE began accepting subscription and waitlist requests to the new site location on June 18, 2021. To date, there are zero subscriptions to the CSGT program as of June 30, 2021. The number of subscriptions is zero for the DAC-GT program because SCE does not currently have an approved DAC-GT project.
