

**SOUTHERN CALIFORNIA EDISON COMPANY'S  
DISADVANTAGED COMMUNITIES GREEN TARIFF AND  
COMMUNITY SOLAR GREEN TARIFF  
FIRST QUARTER 2021 REPORT**

**Background**

Southern California Edison Company (“SCE”) hereby submits its Disadvantaged Communities Green Tariff (“DAC-GT”) and Community Solar Green Tariff (“CSGT”) quarterly report in accordance with Resolution E-4999 ( “Resolution”).

Decision 18-06-027 (“Decision”) also specifies that utilities work with the Energy Division (“ED”) on reporting requirements and that the ED may modify such requirements as necessary.<sup>1</sup> As specific reporting requirements were not designated in the Decision, the Resolution provides standardized reporting requirements to participating investor-owned utilities that include a quarterly Disadvantaged Communities Green Tariff (“DAC-GT”) and Community Solar Green Tariff (“CSGT”) programs progress report with enrollment and subscription details by the program.<sup>2</sup> This filing is the quarterly report described in the Resolution. The reporting period for the quarterly report covers January 1, 2021 - March 31, 2021.

**Discussion**

Pursuant to Decision 18-06-027 (“Decision”) and in accordance with Resolution E-4999, Southern California Edison Company (“SCE”) hereby files this report on the Disadvantaged Communities Green Tariff (“DAC-GT”) and Community Solar Green Tariff (“CSGT”) programs for the period January 2021-March 2021.

SCE’s DAC-GT (also referred to as “Green Saver Program”) has a program capacity allocation of 56.5 megawatts (MW). This program provides a 20% bill discount to California Alternate Rates for Energy Program (“CARE”) or Family Electric Rate Assistance Program (“FERA”) eligible customers located in Disadvantaged Communities (DACs), defined as the top 25% most impacted census tracts statewide as well as an additional 22 census tracts in the highest 5% of Cal EnviroScreen’s Pollution Burden that do not have an overall CalEnviroScreen score because of unreliable socioeconomic or health data. SCE’s CSGT (also referred to as “Local Green Saver Program”) has a program capacity allocation of 14.63 MW and provides a 20% electric bill discount to low-income and non-low-income customers who are located within

---

<sup>1</sup> Decision at p. 55, section 6.4.6 - Reporting.

<sup>2</sup> Resolution at pp. 39-40, Reporting Requirements; id., OP 1.f. at 63. The Resolution provides that the quarterly reports are to be filed with the Commission.

FIRST QUARTER 2021 REPORT**

an eligible census tract and a specified distance from the community solar project built under the program.

On February 27, 2020, SCE launched its first DAC-GT and CSGT solicitation, resulting in a successful offer of a 3 MW CSGT project with Visalia CSG, LLC, which SCE submitted for Commission Approval in Advice Letter 4297-E. The Commission accepted SCE's Advice Letter on October 23, 2020. A second DAC-GT and CSGT solicitation was launched by SCE on September 30, 2020, with no successful bids.

In summary, to date, SCE has completed two DAC-GT and CSGT solicitations, procuring a total of 3 MW of capacity for the CSGT program and 0 MW for the DAC-GT program. Table 1 summarizes the total procured and online solar project capacity, customers subscribed count, and CARE/FERA enrollments for each program

On March 25, 2021, SCE launched its third DAC-GT and CSGT solicitation, and SCE is scheduled to execute those contracts in Q3 2021 if there are any successful candidates.

For this report, "Customers Subscribed" is defined as customers for which capacity has been assigned in either the DAC-GT or CSGT programs. Customers who are on the waitlist are not counted as being subscribed to a program. There are also zero enrollments into the CARE/FERA program since there are no waitlist or enrolled customers in both programs during this reporting period.

**Table 1  
DAC-GT and CSGT Program Summary  
First Quarter 2021**

	<b>CSGT Q1 2021</b>	<b>CSGT Cumulative</b>	<b>DAC-GT Q1 2021</b>	<b>DAC-GT Cumulative</b>
<b>Capacity Procured (MW)</b>	0	3	0	0
<b>Capacity Online (MW)</b>	0	0	0	0
<b>Customers Subscribed</b>	0	0	0	0
<b>CARE/FERA Enrollments</b>	0	0	0	0

**SOUTHERN CALIFORNIA EDISON COMPANY'S

COMMUNITY SOLAR GREEN TARIFF  
FIRST QUARTER 2021 REPORT**

Table 2 details the project that has been procured to date, and the project characteristics, including project name, what program the project was procured for, the project's DAC census tract number, and the project capacity. Currently, there is one (1) project for the CSGT program and zero (0) projects for the DAC-GT program. The CSGT project, Visalia CSG, was unable to receive city approval for their site and is currently in negotiations with SCE to change their site location and update the project's expected online date. The new proposed site will result in a new census tract location (6107001602); the revised delivery time, if approved, is expected to be moved from the first quarter of 2022 to the third quarter of 2022.

**Table 2  
DAC-GT and CSGT Individual Project Details  
First Quarter 2021**

<b>Project Name</b>	<b>Program</b>	<b>Project Capacity (MW)</b>	<b>Project Location (Census Tract)</b>	<b>Project Location (City)</b>
Visalia CSG	CSGT	3	6107001003	Visalia

Table 3 displays the cumulative number of active customers participating in each program as of March 31, 2021. Note that the census tract numbers displayed do not cover the entire SCE territory at this time since we do not have an approved DAC-GT project. Instead, the table reflects only the census tracts eligible to participate in both the original Visalia CSG project site location and the new Visalia CSG proposed project site location for the CSGT program. Please note, we have crossed out census tract 6107002100 that was initially eligible to subscribe to the Visalia CSG project but is no longer considered eligible with the new proposed site location, and the customers with that census tract would no longer be eligible. As noted in the table, from October 26, 2020, to March 31, 2021, SCE has zero (0) enrollments for both the CSGT project and the DAC-GT.

The number of subscriptions is zero for the DAC-GT program because SCE does not currently have an approved DAC-GT project. Regarding the CSGT program, SCE began accepting subscription and waitlist requests on October 26, 2020, and to date, there are zero subscriptions to the CSGT program as of March 31, 2021.
