

The rates and TOU periods vary by utility, but generally, the rates are lowest overnight, allowing drivers enough time to charge their EVs while they are at home. These “off-peak” rates allow EV drivers to fuel their vehicle for less than the equivalent cost of gasoline.

Pacific Gas and Electric Rates:

PG&E: EV-A is closed for new enrollments. Tariff available at EV-A has closed for new enrollments. Tariff available at PG&E: EV2-A (Accessed on September 28, 2021).
