

California Public Utilities Commission

The Clean Energy Access Grant Account Application Webinar

Purpose, Process, and Q&A

Is your organization a 501(c)(3) entity, California Native American Tribe, or tribal entity? Do you want to help the communities you serve prepare for, learn about, and access CPUC clean energy programs? Are you unsure how these programs could benefit your community in the first place?

If so, please join us for a presentation and Q&A on the Clean Energy Access Grant Account. Application evaluators and clean energy program experts will explain the grant purpose, clean energy programs, and application process.

The program will provide awards up to \$500,000 for technical support and community engagement connected to 3 specific energy opportunities:

- Microgrid Incentive Program (MIP)
- Self-Generation Incentive Program (SGIP)
- Technology and Equipment for Clean Heating Initiative (TECH)

These programs provide significant financial support for developing and deploying microgrids and battery backup in vulnerable communities as well as incentives for home electrification.

WEBINAR

CEA Grant Account Application

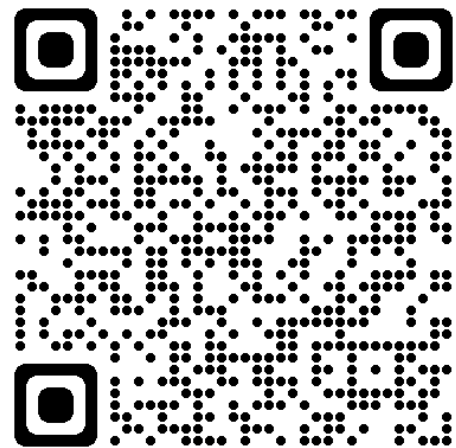

February 7, 2024
10 a.m. – 12 p.m.
